X	Goal 1: Accountability for Student Learning
X	Goal 2: Rigorous Standards to Promote College and Career Readiness
	Goal 3: Expanded Opportunities to Learn
	Goal 4: Nurturing Young Learners
	Goal 5: Highly Qualified and Effective Educators
	Goal 6: Sound Policies for Student Success
	Goal 7: Safe and Secure Schools
	Other Priority or Initiative. Specify:

## Background Information and Statutory Authority:

Goal 1: The Board of Education's comprehensive plan calls for a review of all Standards of Learning on a regular schedule.

The *Code of Virginia* also requires a review of Virginia's Standards of Learning every seven years.

*Code of Virginia*, Section 22.1-253.13:1-B... "The Board of Education shall establish a regular schedule, in a manner it deems appropriate, for the review, and revision as may be necessary of the Standards of Learning in all subject areas. Such review of each subject area shall occur at

least once every seven years. Nothing in this section shall be construed to prohibit the Board from conducting such review and revision on a more frequent basis...”

Goal 2: In its [2012-2017 Comprehensive Plan](#), the Board of Education (BOE) commits to raising the bar on academic performance standards to ensure global competitiveness of Virginia’s graduates. “Building on the success of the Standards of Learning program, more rigorous and relevant expectations will continue to be implemented that meet or exceed national and international benchmarks for college and career readiness.” In the plan (page 22), the BOE has set the adoption of revised *English Standards of Learning* for 2017.

New academic content *Standards of Learning* for English were first developed in 1995. They were revised in 2002 and again in 2010. The *Standards of Quality* require the Board of Education to review the *Standards of Learning* on a regular schedule. The current English Standards of Learning were adopted in 2010 and were scheduled for review in 2017. As a result, on January 28, 2016, the Board received a plan to review these standards and companion Curriculum Framework in 2017. In accordance with the plan, the Department of Education took the following steps to produce a draft of the proposed revised Curriculum Framework for the 2017 *English Standards of Learning* for the Board’s first review:

- Reviewed public comments online comments regarding the 2010 *English Standards of Learning* from stakeholders, including teachers, administrators, and parents;
- Reviewed related resources from other states, National Council of Teachers of English, International Literacy Association, College Board, ACT, and National Assessment for Educational Progress (NAEP) Reading and Writing Framework;
- Met with an educator review committee comprised of curriculum specialists, classroom teachers, administrators, and reading specialists on Jun 26-29, 2017, to develop a proposed draft of the Curriculum Framework for the 2017 *English Standards of Learning*;
- Received feedback from the Office of Student Assessment and School Improvement, Office of Special Education Instruction, Office of Career and Technical Education, higher education colleagues, and state professional organizations; and
- Developed a draft of the proposed revised Curriculum Framework for the 2017 *English Standards of Learning*.

### **Summary of Important Issues:**

The Virginia Department of Education has developed the attached draft of the proposed revised Curriculum Framework for the 2017 *English Standards of Learning* (Attachment A).

The 2017 *English Standards of Learning* were the first standards to be revised using the guidelines of the Profile of a Virginia Graduate. The Profile, developed by the Board of Education, describes knowledge, skills, competencies, and experiences students should attain during their K-12 education to make them “life-ready.” The Profile is comprised of four overlapping areas considered to be essential for success beyond high school: content knowledge; workplace skills; community engagement and civic responsibility; career exploration. The goals of the *English Standards of Learning*, teaching students to read, write, research and communicate, align with the four components of the Profile of a Virginia Graduate and include

the foundational skills of critical thinking, creative thinking, collaboration, communication, and citizenship. Students should be prepared to participate in society as literate citizens, equipped with the ability to think analytically, solve problems, communicate effectively, and collaborate with diverse groups in their communities, in the workplace, and in postsecondary education. Although the strands are developed separately, they are expected to be seamlessly integrated in the classroom. Without a required reading list for English, school divisions have always had the flexibility to design their local curricula to best meet the needs of their students including the exploration of career paths and using technical texts. Through the rigorous application of the English Standards of Learning, students become critical thinkers, effective contributors, and global citizens.

### **Summary of the Proposed Revised Curriculum Framework for the 2017 *English Standards of Learning***

The major elements of the attached proposed revised Curriculum Framework for the 2017 *English Standards of Learning* include:

- Edits to enhance clarity, specificity, rigor, and alignments of skills and content;
- Revisions to align with the 2017 *English Standards of Learning*;
- Emphasis on the K-12 vertical alignment of the strands of Communication and Multimodal Literacies; Reading; Writing; and Research;
- Reorganization of the early literacy skills formerly under an Oral Language strand to the Reading strand ensuring that students receive the strong foundation of phonological and phonemic awareness to become fluent readers;
- Creation of a Communication strand in K-3 focusing on the necessary skills to express needs, ask questions, work collaboratively, and present information;
- Creation of a Research strand in K-3. At the primary level, students will begin to conduct research and use available resources to answer questions, solve problems, and organize information;
- Deletion of first column, which provided some redundant information and definitions;
- Creation of Teacher Notes prior to the beginning of each strand reflecting current academic research and best instructional practices;
- Introduction of reflective writing in grades 6-12;
- Expansion of skills for collaboration, consensus-building, team-building, and working toward common goals;
- Expansion of requirements for nonfiction/informational/technical reading in grades 4-12;
- Emphasis on ethical use of the Internet when gathering and using information;
- Introduction of a focus on a mode or modes of writing at each grade level, increasing in complexity and rigor as students progress through K-12; and
- Edits to enhance clarity, specificity, rigor, alignment of skills and content, and a reflection of the current academic research and practice.

### **Impact on Fiscal and Human Resources:**

The Department of Education administers the state standards review process. The agency's existing resources can absorb this responsibility at this time.

**Timetable for Further Review/Action:** Following the Board of Education's acceptance of the proposed revised Curriculum Framework for the 2017 *English Standards of Learning* for first

review, the Department of Education will receive public comment for at least 30 days before bringing the revised Curriculum Framework for the 2017 *English Standards of Learning* to the Board of Education for final review in November 2017.

**Superintendent's Recommendation:**

The Superintendent of Public Instruction recommends that the Board of Education accept the proposed revised Curriculum Framework for the 2017 *English Standards of Learning* for first review.

## Virginia English Standards of Learning Curriculum Framework 2010-2017

### Introduction

The ~~2010~~ **2017** *English Standards of Learning* Curriculum Framework is a companion document to the ~~2010~~ **2017** *English Standards of Learning* and amplifies the *English Standards of Learning* by defining the content knowledge, skills, and understandings that are measured by the Standards of Learning assessments. The Curriculum Framework **is not meant to be an entire curriculum, but rather to** provide additional guidance to school divisions and their teachers as they develop **their local program of studies** ~~an instructional program~~ appropriate for their students. It assists teachers in their lesson planning by identifying essential understandings, defining essential content knowledge, and describing the intellectual skills students need to use. This supplemental framework delineates in greater specificity the content that all teachers should teach and all students should learn. **The concepts, skills, and content in English Language Arts spiral. Teachers should note each grade level builds skills that carry to the following grades. Each grade level within the English Curriculum Framework builds from kindergarten through grade 12 creating a comprehensive instructional tool, which prepares students for success in the postsecondary education and the workplace. Teachers should review the Curriculum Framework for the scope of learning in each of the strands in previous grades and in the grades to follow.**

~~Each topic in the *English Standards of Learning* Curriculum Framework is developed around the Standards of Learning. The format of the Curriculum Framework facilitates teacher planning by identifying the key concepts, knowledge, and skills that should be the focus of instruction for each standard. The Curriculum Framework is divided into three~~ **two** ~~columns: Understanding the Standard; Essential Understandings; and Essential Knowledge, Skills and Processes. The purpose of each column is explained below.~~

#### *Understanding the Standard* **Overview of Standard and Teacher Notes**

This section includes background information for the teacher. It contains content that may extend the teachers' knowledge of the standard beyond the current grade level. This section may also contain **best practices, instructional strategies, and** suggestions and resources that will help teachers plan lessons focusing **on integrating** ~~on~~ the standard(s). **The Teacher Notes are found at the beginning of each strand in the English Curriculum Framework.**

#### *Essential Understandings*

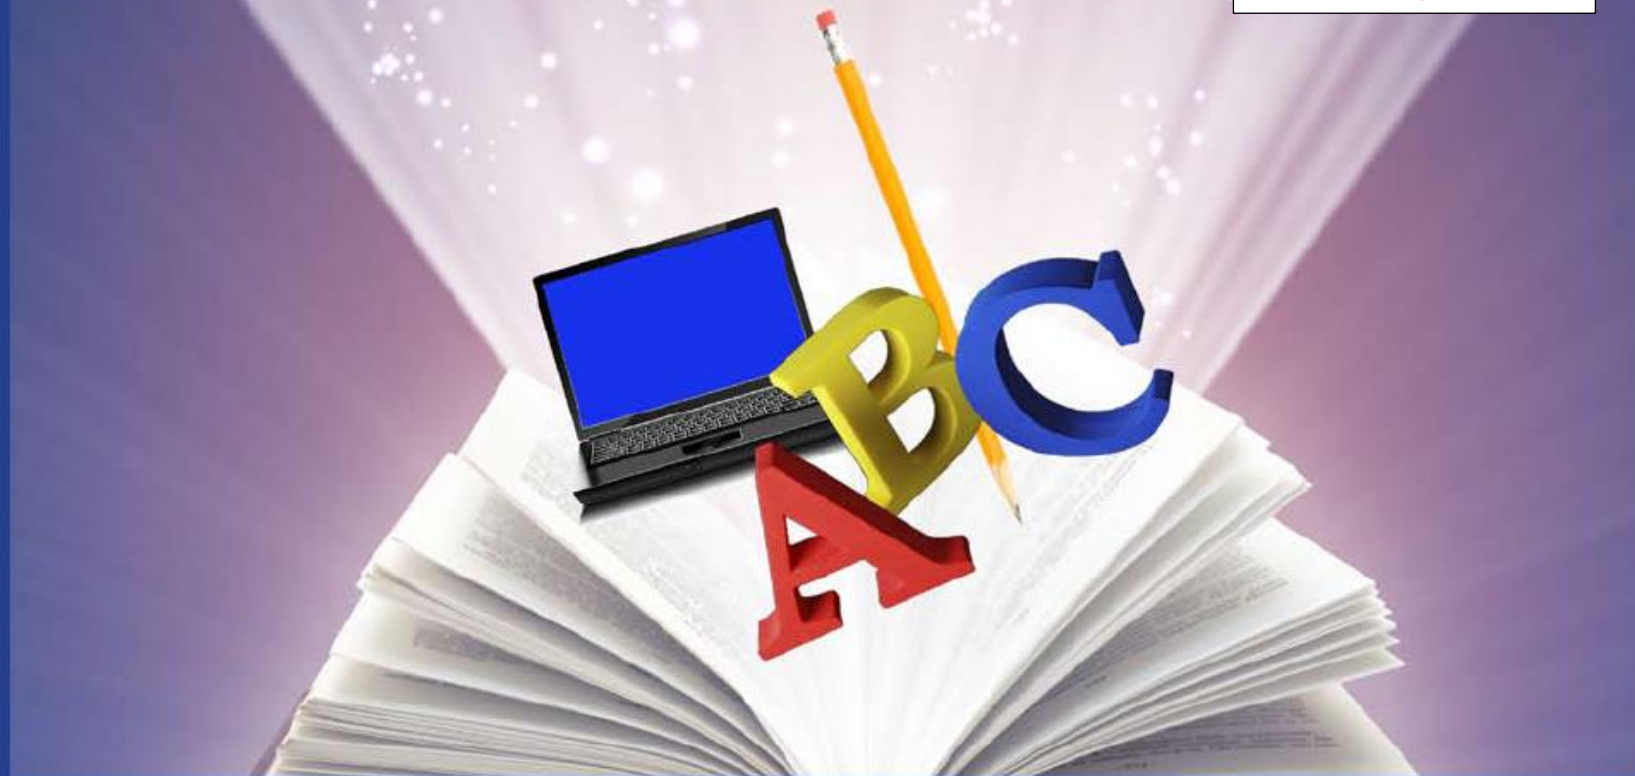

This section delineates the key concepts and ideas that all students should grasp to demonstrate an understanding of the Standards of Learning. These essential understandings are presented to facilitate teacher planning.

#### *Essential Knowledge, Skills, and Processes*

Each Standard is **are** expanded in the Essential Knowledge, Skills, and Processes column. What each student should know and be able to do in each standard is outlined. This is not meant to be an exhaustive list nor a list that limits what is taught in the classroom. It is meant to identify the key knowledge, skills, and processes that define the standard. **The Essential Knowledge, Skills, and Processes is not a one-to-one match of the Standards. If the standard is self-explanatory, there will be no additional explanation in this column. For example the nonfiction reading strand requires students to identify the main idea; there is not a corresponding entry in the EKSP column explaining how to identify a main idea.**

The Curriculum Framework serves as a guide for Standards of Learning assessment development. Assessment items may not and should not be a verbatim reflection of the information presented in the Curriculum Framework. Students are expected to continue to apply knowledge, skills, and processes from Standards of Learning presented in previous grades as they build expertise in English.

# English Standards of Learning CURRICULUM FRAMEWORK **2017**

**Kindergarten**

Board of Education, Commonwealth of Virginia

At the kindergarten level, students will ~~engage in a variety of oral language activities in order to~~ develop their understanding of language and enhance their ability to communicate effectively. ~~Of primary importance is the development of phonological awareness, which is essential for success in literacy.~~ Emphasis will be placed on having the students build and use listening and speaking vocabularies through participation in oral language activities employing poems, rhymes, songs, and stories. Students will learn rules for conversation, ~~and~~ skills for participation in discussions, and how to work respectfully with others. They will also learn how to formulate basic investigative questions. Teachers will encourage the development of interpersonal skills that are foundational to effective communication and collaboration. These skills are essential for success in future postsecondary education and the workplace.

---

**Teacher Notes:**

- Teachers should provide daily opportunities for student communication and participation in oral language activities in a variety of settings.
- Multimodal is the strategic use of two or more interdependent modes of communication where both modes are essential to convey the intended message. For example: graphics, written language, moving images, music, audio, presentation technologies, movement, etc.

**K.1 The student will build oral communication skills.**

- a) Listen actively and speak using agreed-upon rules for discussion.**
- b) Express ideas in complete sentences and express needs through direct requests.**
- c) Initiate conversations.**
- d) Follow implicit rules for conversation, including taking turns and staying on topic.**
- e) Listen and speak in informal conversations with peers and adults.**
- f) Discuss various texts and topics collaboratively and with partners.**
- g) Use voice level, phrasing, and intonation appropriate for various language situations.**
- h) Follow one- and two-step directions.**
- i) Ask how and why questions to seek help, get information, or clarify information.**
- j) Work respectfully with others.**

~~about a class field trip).~~

- ~~dictate an experience or story to create an individual language experience narrative (e.g., a story about a family pet).~~
- ~~use drama to retell familiar stories, rhymes, and poems (e.g., storytelling with role play or puppets).~~
- ~~participate in creative dramas, such as classroom songs, plays, skits, and group activities designed to give students frequent opportunities for listening and speaking.~~
- ~~use complete sentences that include subject, verb, and object when speaking.~~

<b>K.2 The student will demonstrate growth in oral, early literacy skills.</b> <b>a) Listen and respond to a variety of text and media.</b> <b>b) Participate in a variety of oral language activities including choral and echo speaking and recitation.</b> <b>c) Tell stories orally.</b> <b>d) Participate in creative dramatics.</b>	
ESSENTIAL UNDERSTANDINGS	ESSENTIAL KNOWLEDGE, SKILLS, AND PROCESSES
<p>All students should</p> <ul style="list-style-type: none"> <li>• <u>understand that choral and echo speaking builds oral literacy skills.</u></li> <li>• <u>understand that telling oral stories and participating in creative dramatics develops comprehension.</u></li> </ul>	<p>To be successful with this standard, students are expected to</p> <ul style="list-style-type: none"> <li>• listen to texts read aloud and ask and answer questions for further understanding.</li> <li>• participate in choral and echo speaking and recitation of short poems, rhymes, songs, and stories with repeated patterns and refrains.</li> <li>• <del>generate ideas to develop a group language experience narrative.</del></li> <li>• <del>dictate sentences about a group experience for a group language experience narrative (e.g., a story about a class field trip).</del></li> <li>• <del>dictate an experience or story to create an individual language experience narrative (e.g., a story about a family pet).</del></li> <li>• use drama to retell familiar stories, rhymes, and poems (e.g., storytelling with role play or puppets).</li> <li>• participate in creative dramatics, such as classroom songs, plays, skits, and group activities <del>designed to give students frequent opportunities for listening and speaking.</del></li> <li>• <del>use complete sentences that include subject, verb, and object when speaking.</del></li> </ul>

~~At the kindergarten level, students will be immersed in a print-rich environment. They will learn the concepts of print, basic phonetic principles, comprehension of stories, and letter identification skills through systematic, direct instruction, individual and small group activities, and time spent exploring and reading books and other print material. Students will learn to identify and name the uppercase and lowercase letters of the alphabet, understand that letters represent sounds, and identify beginning consonant sounds in single consonant words. They will also learn to comprehend and relate stories through drama, retelling, drawing, and their own writing.~~

The kindergarten student will be immersed in a text -rich environment to develop phonological awareness, print awareness, vocabulary, comprehension, and an appreciation for reading. The exposure to fiction and nonfiction texts will enable students to develop an awareness of reading materials as sources of information and enjoyment. Students will learn to identify and name the capital and lowercase letters of the alphabet, understand that letters represent sounds, and identify initial and final consonant sounds in one syllable words. The kindergarten student will expand both listening and speaking vocabularies. They will also learn to comprehend and think creatively as they relate stories through drama, retelling, drawing, and their own writing. Teachers will encourage the development of reading skills that are foundational to effective comprehension and critical thinking. These skills are essential for success in future postsecondary education and the workplace.

Teacher Notes:

- Teachers should teach the concepts of print, basic phonetic principles, comprehension of stories, and letter identification skills through systematic, direct instruction, individual and small group activities, and time spent exploring and reading books and other print material.
- Please note there is not a specific list or number of sight words students must learn. In order to build a personal word bank, students will develop the ability to read their own names and common high-frequency words in context.
- Teachers need to read texts aloud to model language and introduce students to new words, expand working vocabularies, and improve comprehension.

**K.3 The student will orally identify, segment, and blend various phonemes to develop phonological and phonemic awareness.**

- a) Begin to discriminate between spoken sentences, words, and syllables.**
- b) Identify and produce words that rhyme.**
- c) Blend and segment multisyllabic words at the syllable level.**
- d) Blend and segment one-syllable words into phonemes including onset and rime.**
- e) Identify words according to shared beginning and/or ending sounds.**
- f) Blend sounds to make one-syllable words.**
- g) Segment one-syllable words into individual phonemes.**

ESSENTIAL UNDERSTANDINGS	ESSENTIAL KNOWLEDGE, SKILLS, AND PROCESSES
<p><b>All students should</b></p> <ul style="list-style-type: none"> <li>understand that words are made up of small units of sound and that these sounds can be blended to make a word.</li> <li>understand that words are made up of syllables.</li> <li>understand that a spoken sentence is made up of individual words.</li> </ul>	<p><b>To be successful with this standard, students are expected to</b></p> <ul style="list-style-type: none"> <li><del>focus on speech sounds.</del></li> <li><del>demonstrate the concept of word by segmenting spoken sentences into individual words.</del></li> <li>segment a word into individual syllables <b>using strategies including but not limited to</b> clapping hands or snapping fingers.</li> <li><b>identify and</b> discriminate between <del>large phonological units of running speech</del>, sentences, words, and syllables.</li> <li>identify a word that rhymes with a spoken word.</li> <li>supply a word that rhymes with a spoken word.</li> <li>produce rhyming words and recognize pairs of rhyming words presented orally.</li> <li>generate rhyming words based on a given rhyming pattern, familiar nursery rhyme, or predictable text.</li> <li><del>supply an appropriate rhyming word to complete a familiar nursery rhyme or a predictable text with rhyming lines.</del></li> <li>blend and segment onsets and rimes of spoken words (e.g., /b/- /oat/ = <i>boat</i>, <i>black</i> = /bl/- /ack/).</li> <li>blend and segment multisyllabic words into syllables (e.g., the teacher asks students to <i>say robot without the /ro-/</i> and students respond with /bot/).</li> <li><b><u>blend individual phonemes to make one-syllable words (e.g., /sh/-/i/-/p/= ship).</u></b></li> </ul>

**K.7 The student will expand vocabulary and use of word meanings.**

- a) Discuss meanings of words.
- b) Increase vocabulary by listening to a variety of texts read aloud.
- c) Use vocabulary from other content areas.
- d) Ask about words not understood.
- e) Use number words.
- f) Use nouns to identify and name people, places, and things.
- g) Use adjectives to describe location, size, color, and shape.
- h) Use verbs to identify actions.

At the kindergarten level, students will begin to build a connection between oral and written language. Awareness that spoken language can be written and written language can be read is a fundamental concept in communicating ideas. Students will learn to print the capital and lowercase letters of the alphabet as well as their first and last names. Kindergarten writing reflects the students' oral language, and students will communicate their ideas through pictures and writing. Teachers will encourage the development of writing skills that are foundational to effective written communication and critical thinking. These skills are necessary for success in future postsecondary and workplace environments. ~~Students will communicate their ideas through drawings, scribbles, letter strings, letter approximations, and dictation to adults.~~

**Teacher notes:**

- Teachers should model the writing process for students.
- The focus of writing in Kindergarten is narrative and descriptive.
- Teachers should model real-world writing experiences.
- Teachers should encourage students to write about what they know and what they experience.

<b>K.10 The student will print in manuscript.</b> <b>a) Print capital and lowercase letters of the alphabet independently.</b> <b>b) Print his/her first and last names.</b>

**K.11 The student will write in a variety of forms to include narrative and descriptive.**

- a) Differentiate pictures from writing.
- b) Use prewriting activities to generate ideas including drawing pictures.
- c) Use letters to phonetically spell words that describe pictures or experiences.
- d) Write left to right and top to bottom.
- e) Compose simple sentences.
- f) Begin each sentence with a capital letter and use ending punctuation.
- g) Share writing with others.

The student will be introduced to the research process by asking investigative questions, which will be used to solve problems. Research in kindergarten prepares students for more formalized research in subsequent grades.

Teacher Notes:

- Teachers should have students collaborate in whole or small groups to generate topics, ask questions, and find information.
- Please note kindergarten students are not expected to complete research products.

<b>K.12 The student will conduct research to answer questions or solve problems using available resources.</b> <b>a) Generate topics of interest.</b> <b>b) Generate questions to gather information.</b> <b>c) Identify pictures, texts, or people as sources of information.</b> <b>d) Find information from provided sources.</b>

# English Standards of Learning CURRICULUM FRAMEWORK **2017**

**Grade One**

Board of Education, Commonwealth of Virginia

At the first-grade level, students will further develop their understanding of language and enhance their ability to communicate effectively. The student will use listening and speaking skills to participate in classroom discussions and work respectfully with others. They will also begin to use their oral language skills to gain and explain information. ~~In addition, students will continue to develop the higher-level phonemic awareness skills of segmentation, deletion, and substitution.~~ Students will build and use listening and speaking vocabularies to tell and retell stories and participate in choral speaking, recitation, and creative dramatics.

Teacher Notes:

- Teachers should provide daily opportunities for student communication and participation in oral language activities in a variety of settings.
- Multimodal is the strategic use of two or more interdependent modes of communication where both modes are essential to convey the intended message. For example: graphics, written language, moving images, music, audio, presentation technologies, movement, etc.

**1.1 The student will develop oral communication skills.**

- a) Listen actively and speak using agreed-upon rules for discussion.
- b) Initiate conversation with peers and adults.
- c) Adapt or change oral language to fit the situation.
- d) Use appropriate voice level, phrasing, and intonation.
- e) Participate in collaborative and partner discussions about various texts and topics.
- f) Follow rules for conversation using appropriate voice level in small-group settings.
- g) Ask and respond to questions to seek help, get information, or clarify information.
- h) Restate and follow simple two-step oral directions.
- i) Give simple two-step oral directions.
- j) Express ideas orally in complete sentences.
- k) Work respectfully with others.
- l) Increase listening and speaking vocabularies.

~~At the first-grade level, students will continue to be immersed in a print-rich environment. Having developed a concept of word and letter-sound correspondence, students will now concentrate on learning and integrating basic phonetic principles, decoding words in isolation using meaning clues, and employing language and sentence structure to read and substantially increase their sight-word vocabulary. By the end of the first grade, they should have a reading vocabulary of 300 to 500 commonly used sight words and be able to decode single-syllable words.~~

~~These concepts and skills will be learned through systematic explicit direct instruction, individual and small-group activities, and time spent exploring and reading books and other print material. Through reading decodable books, students will build fluency and automaticity in using their knowledge of phonetic principles and print to read. Reading and listening to both fiction and nonfiction texts will give students opportunities to respond to readings in group discussions and through writing and drawing. Through reading and rereading, the students will build fluency and vocabulary and will become independent readers. Students will learn to use their knowledge of alphabetical order by first letter to find the meanings of unfamiliar words in picture and simple word dictionaries.~~

**The student will be immersed in a text rich environment to develop phonological awareness, phonetic skills, vocabulary, comprehension and to use reading materials as sources of information and enjoyment. Having developed a concept of word and letter-sound correspondence, students will now concentrate on learning and integrating basic phonetic principles, decoding words in isolation and in context, using meaning clues, and employing language and sentence structure to read and substantially increase their sight-word vocabulary. The student will use a variety of strategies to read new words and will read familiar selections with fluency, accuracy, and expression. The student will continue to develop an understanding of fiction and nonfiction texts and respond to readings through group discussions and writing. The student will increase vocabulary and comprehension strategies through cross-content reading. Teachers will encourage the development of reading skills that are foundational to effective comprehension and critical thinking. These skills are essential for success in future postsecondary education and the workplace.**

**Teacher Notes:**

- **These concepts and skills should be taught through systematic explicit direct instruction, individual and small-group activities, and time spent reading books and other print material.**
- **Teachers should provide opportunities for independent reading with options for student choice.**
- **Teachers need to read texts aloud to model language and expose students to new words, expand working vocabularies, and improve comprehension.**
- **Teachers should provide opportunities for students to apply strategies as they read and reread a variety of texts.**
- **Teachers should teach theme with fiction texts and main idea with nonfiction texts. Please note these terms are not interchangeable.**

<p><b>1.3 The student will orally identify, produce, and manipulate various phonemes within words to develop phonological and phonemic awareness.</b></p> <p><b>a) Create rhyming words.</b></p> <p><b>b) Count phonemes (sounds) in one-syllable words.</b></p> <p><b>c) Blend sounds to make one-syllable words.</b></p> <p><b>d) Segment one-syllable words into individual phonemes.</b></p> <p><b>e) Add or delete phonemes to make new words.</b></p> <p><b>f) Blend and segment multisyllabic words at the syllable level.</b></p>

At the first-grade level, reading and writing will develop together. Students will be given daily opportunities to write and read their writing. **The student will write in a variety of forms to communicate ideas.** As their knowledge of letter-sound correspondence and their sight-word vocabulary increases, they will be able to use these skills to put their ideas and thoughts on paper. ~~Students need to be encouraged to write for real purposes by writing such things as letters, notes, signs, stories, and labels. At this level, students will concentrate on writing a complete simple sentence, using basic conventions.~~ With teacher guidance and support, they will also begin to revise and edit selected pieces of their writing for a specific audience. **Teachers will encourage the development of writing skills that are foundational to effective written communication and critical thinking. These skills are necessary for success in future postsecondary and workplace environments.**

**Teacher notes:**

- **Teachers should model the writing process for students.**
- **Teachers should refer to examples of writing in mentor texts.**
- **The focus of writing in first grade is narrative, descriptive, and opinion.**
- **Teachers should provide opportunities for students to express opinions with a reason both orally and in writing.**

# English Standards of Learning CURRICULUM FRAMEWORK **2017**

**Grade Two**

Board of Education, Commonwealth of Virginia

At the second-grade level, students will ~~engage in a variety of oral activities to develop an understanding of language structure and enhance their ability to communicate effectively. They will listen and speak in discussions and presentations that expand their vocabularies, increase their background knowledge, and enhance both their reading and writing skills.~~ **The student will use listening and speaking skills to participate in classroom discussions, work respectfully with others, and develop simple presentations using multimodal tools. Students will create oral stories and participate in choral speaking, recitation, and creative dramatics. Students will take turns in different roles during collaborative activities. Teachers will encourage the development of interpersonal skills that are foundational to effective communication and collaboration. These skills are essential for success in future postsecondary education and the workplace.**

**Teacher Notes:**

- **Teachers should provide daily opportunities for student communication and collaboration in a variety of settings.**
- **Teachers should provide opportunities for students to create multimodal presentations independently or collaboratively.**
- **Multimodal is the strategic use of two or more interdependent modes of communication where both modes are essential to convey the intended message. For example: graphics, written language, moving images, music, audio, presentation technologies, movement, etc.**

**2.1 The student will use oral communication skills.**

- a) Listen actively and speak using appropriate discussion rules.
- b) Use oral language for different purposes: to inform, persuade, entertain, clarify, and respond.
- c) Speak audibly with appropriate voice level, phrasing, and intonation.
- d) Share information orally with appropriate facts and relevant details.
- e) Use increasingly complex sentence structures in oral communication.
- f) Begin to self-correct errors in language use.
- g) Participate as a contributor and leader in collaborative and partner discussions.
- h) Ask and answer questions to seek help, get information, or clarify information.
- i) Retell information shared by others.
- j) Restate and follow multi-step directions.
- k) Give multi-step directions.
- l) Work respectfully with others and show value for individual contributions.
- m) Create a simple presentation using multimodal tools.

At the second-grade level, students will continue to be immersed in a print-rich environment. To decipher text, they will use what they have learned about phonemes, decoding, rhyming words, onsets and rimes, contextual clues, and the structure of sentences. Silent and independent reading will increase, with some parts of books read aloud for emphasis, clarification, or pleasure. When they read independently, students will understand and enjoy books that are considerably longer and more complex in plot, syntax, and structure. Students will read and reread to build fluency, which provides the bridge between word recognition and comprehension. Fluent readers are able to make connections among the ideas in the text and between the text and their background knowledge. Students will learn and apply the comprehension strategies of identifying main ideas, making and confirming predictions, and formulating questions about what they are learning across the curricula. Students will also use their knowledge of alphabetical order to locate information.

Developing literacy skills continues to be a priority in the second grade. The student will be immersed in an environment filled with fiction and nonfiction texts, which relate to all content areas and personal interests. The student will expand vocabulary, use a combination of strategies when reading, and read familiar selections with fluency, accuracy, and expression. The student will demonstrate comprehension skills by identifying main ideas, making and confirming predictions, questioning, summarizing, and drawing conclusions. Students will learn and apply comprehension strategies while reading cross-content materials. Teachers will encourage the development of reading skills that are foundational to effective comprehension and critical thinking. These skills are essential for success in future postsecondary education and the workplace.

**Teacher Notes:**

- Teachers should provide opportunities for both independent and silent reading with options for student choice.
- Teachers should introduce students to longer, more complex texts.
- At this point, students should understand that plot is important events that occur in fiction. Theme can be defined as topical theme (friendship, family, working hard) or lesson in fiction. (lesson learned in The Ugly Duckling)
- Expansion of vocabulary comes through the use of authentic texts whether read aloud or independently.
- Teachers should teach theme as a literary term with fiction texts and main idea with nonfiction texts. However, main idea is a skill that is still essential in comprehending all texts. Please note these terms are not interchangeable.
- In teaching fiction, teachers should also note the introduction of story elements including plot, conflict, and resolution.
- Teachers should have students write about what they have read.

<b>2.3 The student will orally identify, produce, and manipulate various phonemes within words to develop phonemic awareness.</b> <b>a) Count phonemes within one-syllable words.</b> <b>b) Blend sounds to make one-syllable words.</b> <b>c) Segment one-syllable words into phonemes.</b> <b>d) Add or delete phonemes to make words.</b> <b>e) Blend and segment multisyllabic words at the syllable level.</b>

At the second-grade level, students will continue to develop reading and writing together. They will be given daily opportunities to write and will be expected to revise selected pieces and share them with others. Students will begin to make the transition to cursive handwriting. The student will understand writing as a process and will write in a variety of forms. ~~Students often pattern their writing after familiar authors. When students write stories and letters, the instructional emphasis will be on having a beginning, middle, and end. At the sentence level, Students will~~ organize writing according to type and purpose and will elaborate to provide support and detail. ~~they will be expected to begin to elaborate on their ideas and use basic conventions. They will also begin to apply written communication skills across all content areas.~~ Teachers will encourage the development of writing skills that are foundational to effective written communication and critical thinking. These skills are necessary for success in future postsecondary and workplace environments.

Teacher notes:

- Teachers should model the writing process for students.
- Teachers should refer to examples of writing in mentor texts.
- The focus of writing in second grade is narrative, descriptive, opinion, and expository.
- Teachers will teach students to include facts in support of a main idea.
- Teachers should use student writing to teach editing skills.
- Teachers will provide opportunities for students to both orally and in writing express opinions with a reason.

# English Standards of Learning CURRICULUM FRAMEWORK **2017**

**Grade Three**

Board of Education, Commonwealth of Virginia

~~At the third-grade level, students will learn oral communication skills to participate in discussions about learning and take part in collaborative learning projects. In order to be contributing participants in discussions, students must know the skills involved in effectively communicating ideas and opinions, including such skills as actively listening to others and constructively agreeing or disagreeing with them. While using grammatically correct language, students will learn how to present information succinctly and confidently in oral presentations.~~

**The student will use communication skills to participate in classroom discussions, work respectfully with others in a variety of situations, and develop presentations using multimodal tools. Students will develop specific skills for organizing, expressing, and presenting ideas or information. Teachers will encourage the development of interpersonal skills that are foundational to effective communication and collaboration. These skills are essential for success in future postsecondary education and the workplace.**

**Teacher Notes:**

- **Please note presentation skills may differ within classrooms.**
- **Teachers should provide opportunities for students to create multimodal presentations independently or collaboratively.**
- **Multimodal is the strategic use of two or more interdependent modes of communication where both modes are essential to convey the intended message. For example: graphics, written language, moving images, music, audio, presentation technologies, movement, etc.**

<p><b>3.1 The student will use effective communication skills in a variety of settings.</b></p> <p>a) Use active listening strategies including but not limited to making eye contact, facing the speaker, asking questions, and summarizing.</p> <p>b) Present accurate directions to individuals and small groups.</p> <p>c) Ask and respond to questions from teachers and other group members.</p> <p>d) Orally summarize information expressing ideas clearly.</p> <p>e) Use language appropriate for context and audience.</p> <p>f) Increase listening and speaking vocabularies.</p> <p>g) Participate in collaborative discussions.</p> <p>h) Work respectfully with others in pairs, diverse groups, and whole class settings.</p>	
ESSENTIAL UNDERSTANDINGS	ESSENTIAL KNOWLEDGE, SKILLS, AND PROCESSES
<p>All students should</p> <ul style="list-style-type: none"> <li>• <u>understand the importance of effective communication.</u></li> <li>• <u>understand the importance of working collaboratively.</u></li> <li>• <del>participate effectively in group activities by using language appropriate for the context and by taking turns in conversations and moving group discussions forward.</del></li> <li>• <del>increase listening and speaking vocabularies.</del></li> </ul>	<p>To be successful with this standard, students are expected to</p> <ul style="list-style-type: none"> <li>• participate in a range of collaborative discussions building on others' ideas and clearly <del>expressing</del> <u>stating thoughts, opinions, and information</u> <del>their own (e.g., one-on-one, small group, teacher led).</del></li> <li>• engage in taking turns in conversations by:             <ul style="list-style-type: none"> <li>making certain all group members have an opportunity to contribute;</li> <li>listening attentively</li> <li>making eye contact while facing the speaker;</li> <li>eliciting information or opinions from others;</li> <li>supporting opinions with appropriate ideas, examples, and details; and</li> <li>indicating disagreement in a constructive manner.</li> </ul> </li> <li>• take initiative in moving a group discussion forward by:             <ul style="list-style-type: none"> <li>following rules for discussions and assigned group roles;</li> <li>contributing information that is on topic;</li> <li>answering questions;</li> <li>asking clarifying questions of the speaker;</li> <li>summarizing the conclusions reached in the discussion; and</li> <li>explaining what has been learned; and</li> <li><u>working respectfully with others.</u></li> </ul> </li> <li>• ask and respond to questions to check for understanding <del>of information</del> <u>or to clarify information</u> <del>presented (e.g., stay on topic, link remarks to those of others).</del></li> <li>• <del>use language appropriate for the context of the discussion.</del></li> </ul>

**3.1 The student will use effective communication skills in a variety of settings.**

- a) Use active listening strategies including but not limited to making eye contact, facing the speaker, asking questions, and summarizing.**
- b) Present accurate directions to individuals and small groups.**
- c) Ask and respond to questions from teachers and other group members.**
- d) Orally summarize information expressing ideas clearly.**
- e) Use language appropriate for context and audience.**
- f) Increase listening and speaking vocabularies.**
- g) Participate in collaborative discussions.**
- h) Work respectfully with others in pairs, diverse groups, and whole class settings.**

UNDERSTANDINGS**

**ESSENTIAL KNOWLEDGE, SKILLS, AND PROCESSES**

- ~~increase their listening and speaking vocabularies through group activities such as:~~  
~~engaging in activities that require following directions; and~~  
~~attempting to use new words in meaningful sentences.~~

<p><b>3.2 The student will give oral presentations.</b></p> <p>a) Speak clearly using appropriate volume.</p> <p>b) Speak at an understandable rate.</p> <p>c) Make eye contact with the audience.</p> <p>d) Organize ideas sequentially or around major points of information using appropriate facts and relevant details.</p> <p>e) Use contextually appropriate language and specific vocabulary to communicate ideas.</p> <p>f) Use multimodal tools to create presentations and enhance communication.</p>	
ESSENTIAL UNDERSTANDINGS	ESSENTIAL KNOWLEDGE, SKILLS, AND PROCESSES
<p><b>All students should</b></p> <ul style="list-style-type: none"> <li>organize information on a topic when presenting an oral report.</li> <li>speak clearly at an understandable rate and volume.</li> <li><u>understand the process of effectively organizing and presenting ideas and information.</u></li> </ul>	<p><b>To be successful with this standard, students are expected to</b></p> <ul style="list-style-type: none"> <li>deliver oral presentations in an engaging manner that maintains audience interest by: <ul style="list-style-type: none"> <li>reporting on a topic, telling a story, or recounting an experience with appropriate facts and relevant details;</li> <li>presenting information with expression and confidence;</li> <li>varying tone, pitch, and volume to convey meaning;</li> <li>speaking at an understandable rate;</li> <li>selecting words and phrases for effect;</li> <li>using visual media <u>multimodal tools</u> (e.g., images, posters, and charts) to emphasize or enhance facts or details;</li> <li>using specific vocabulary appropriate for the audience and the topic; and</li> <li>using grammatically correct language.</li> </ul> </li> <li>stay on topic during presentations.</li> <li>organize ideas sequentially or around major points of information.</li> <li>answer questions from the audience.</li> <li>evaluate their own presentations, using class-designed criteria.</li> </ul>

At the third-grade level, students will make the transition from a focus on learning how to read to an emphasis on reading to learn and reading for enjoyment. An emphasis will be placed on learning about words, reading age-appropriate text with fluency and expression, and learning comprehension strategies. They will build reading comprehension through reading a variety of literature, to include, but not be limited to, narrative fiction, such as folktales, and nonfiction materials, such as biographies and autobiographies. Students will continue to develop strategic reading skills, such as word analysis and construction of meaning from text. Process strategies that they implement before, during, and after reading will assist their comprehension in all subjects (for example, when reading word problems in mathematics, investigating scientific concepts, and comparing important people and events in history). Students will use a variety of print resources to research topics.

The student will read a variety of fiction and nonfiction texts, which relate to all content areas and personal interests. Students will continue to develop strategic reading skills, such as word analysis and construction of meaning from text. Students will continue to use comprehension strategies to compare and contrast story elements and differentiate between fiction and nonfiction. Teachers will encourage the development of reading skills that are foundational to effective comprehension and critical thinking. These skills are essential for success in future postsecondary education and the workplace.

**Teacher Notes:**

- Teachers should provide increased opportunities for silent reading with options for student choice.
- Teachers should introduce students to longer and/or more complex texts both on grade level and above.
- Vocabulary words should be culled from student reading instead of using random lists and should not be taught in isolation.
- Teachers should teach theme as a literary term with fiction texts and main idea with nonfiction texts. However, main idea is a skill that is still essential in comprehending all texts. Please note these terms are not interchangeable.
- In teaching fiction, teachers should also note the introduction of story elements including narrator, plot, conflict, and resolution.
- Please note literary nonfiction is now included in the fiction standard.
- Teachers should have students write about what they have read.

<b>3.3 The student will apply word-analysis skills when reading.</b> <b>a) Use knowledge of regular and irregular vowel patterns.</b> <b>b) Decode regular multisyllabic words.</b>

At the third-grade level, students will continue to develop reading and writing together. their writing skills. When they write letters, stories, and simple explanations, the instructional emphasis will be on paragraph development. Students will use the writing process to plan, draft, revise, and edit writing in a variety of forms. Their sentences Student writing will become more complex, and they students will learn to select details to elaborate the main idea of the a paragraph. Students will revise and edit for correct sentence formation, grammar, capitalization, punctuation, and spelling. They will use their written communication skills across content areas the curricula. Students also will write legibly in cursive. Teachers will encourage the development of writing skills that are foundational to effective written communication and critical thinking. These skills are necessary for success in future postsecondary and workplace environments.

Teacher notes:

- Teachers should model the writing process for students.
- Teachers should refer to examples of writing in mentor texts.
- The focus of writing in third grade is narrative, descriptive, opinion, and expository.
- Teachers will teach students to develop a paragraph including a clear topic sentence that focuses on the main idea.
- Teachers should use student writing to teach editing skills.
- Teachers should introduce students to the three domains of writing:
  - Composing-focusing on a clear, central idea, providing elaboration and organization
  - Written Expression- selected vocabulary and information
  - Usage/Mechanics- grammar, punctuation, and usage as appropriate for the grade level
- Teachers should utilize writing conferences and portfolios to monitor student progress.
- Please note that although cursive letters are introduced in second grade, it is at the third-grade level that the transition from manuscript to cursive should be completed. No specific form of cursive is required.

Students will continue to identify and use appropriate resources to complete a research product. Students will understand plagiarism and will report information using their own words. Teachers will encourage the development of research skills that are foundational to effective critical thinking and responsible use of information. These skills are necessary for success in future postsecondary education and workplace environments.

Teacher Notes:

- Teachers should note that research can be collaborative, cross-curricular, and integrated throughout the year.
- Teachers should utilize librarian/media specialist's assistance in teaching the research process.
- Teachers should teach students the difference between plagiarism and using their own words.
- Teachers should model responsible use of the Internet.

<b>3.10 The student will demonstrate comprehension of information resources to research a topic and complete a research product.</b> <b>a) Construct questions about the topic.</b> <b>b) Access appropriate resources.</b> <b>c) Collect and organize information about the topic.</b> <b>d) Evaluate the relevance of the information.</b> <b>e) Avoid plagiarism and use own words.</b> <b>f) Demonstrate ethical use of the Internet.</b>

# English Standards of Learning CURRICULUM FRAMEWORK **2017**

**Grade Four**

Board of Education, Commonwealth of Virginia

~~At the fourth-grade level, students will apply oral communication skills to participate in discussions about learning and take part in collaborative learning projects. In order to be contributing participants in discussions, students must apply the skills involved in effectively communicating ideas and opinions, including skills such as actively listening to others and constructively agreeing or disagreeing with them. While using grammatically correct language and specific vocabulary, students will learn how to present information succinctly and confidently in oral presentations.~~

**At the fourth-grade level, the student will continue to increase communication and collaboration skills by working in diverse teams. In order to be contributing participants in discussions, students will apply skills to effectively communicate ideas and opinions, while showing value for others' contributions. Students will deliver interactive multimodal presentations and begin to examine media messages. Teachers will encourage the development of effective interpersonal communication and collaboration skills that are essential for success in future postsecondary education and workplace environments.**

**Teacher Notes:**

- **Please note presentation skills may differ within classrooms.**
- **Teachers should explicitly teach effective presentations skills with audience involvement.**
- **Teachers should provide opportunities for students to create interactive multimodal presentations.**
- **Multimodal is the strategic use of two or more interdependent modes of communication where both modes are essential to convey the intended message. For example: graphics, written language, moving images, music, audio, presentation technologies, movement, etc.**

**4.1 The student will use effective oral communication skills in a variety of settings.**

- a) Listen actively and speak using appropriate discussion rules.
- b) Contribute to group discussions across content areas.
- c) Orally summarize information expressing ideas clearly.
- d) Ask specific questions to gather ideas and opinions from others.
- e) Use evidence to support opinions and conclusions.
- f) Connect comments to the remarks of others.
- g) Use specific vocabulary to communicate ideas.
- h) Demonstrate the ability to collaborate with diverse teams, while sharing responsibility for the work.
- i) Work respectfully with others, and show value for individual contributions.

~~At the fourth grade level, students will build on their reading and reading comprehension skills. They will continue to develop fluency as they use strategies such as word analysis, use of context clues, and the making of inferences to gain meaning from text. Students will use reading strategies before, during, and after reading to develop and demonstrate comprehension. The use of graphic organizers will facilitate students' understanding of text organization and will help them summarize and draw conclusions from fiction and nonfiction text. Students will read widely from content area and nonfiction texts. They will also collect information from a variety of resources in order to acquire additional knowledge about a topic. They will construct questions about their topic, gather information, and synthesize the information for use in their oral presentations and writings.~~

**In fourth grade, there is an increased emphasis on reading comprehension by comparing fiction and nonfiction texts, identifying cause and effect relationships, and differentiating between fact and opinion. The student will expand vocabulary using knowledge of roots, affixes, synonyms, antonyms, and homophones. Teachers will encourage the development of reading skills that are foundational to effective comprehension and critical thinking. These skills are essential for success in future postsecondary education and the workplace.**

**Teacher Notes:**

- **Teachers must provide increased opportunities for silent reading with options for student choice.**
- **Teachers should introduce students to longer and/or more complex texts both on grade level and above.**
- **Vocabulary words should be culled from student reading instead of using random lists and should not be taught in isolation.**
- **Teachers should teach theme as a literary term with fiction texts and main idea with nonfiction texts. However, main idea is a skill that is still essential in comprehending all texts. Please note these terms are not interchangeable.**
- **Please note teachers should introduce specific genres of fiction including but not limited to: fantasy, humor, fable/fairy tale, realistic fiction, historical fiction, and folklore/tall tales.**
- **Teachers should use fictional and informational texts paired on a common theme or topic and have students compare/contrast.**
- **Teachers should teach author's purpose exclusively with nonfiction texts.**
- **Teachers should have students write about what they have read.**

<p><b>4.4 The student will expand vocabulary when reading.</b></p> <p><b>a) Use context to clarify meanings of unfamiliar words.</b></p> <p><b>b) Use knowledge of roots, affixes, synonyms, antonyms, and homophones to determine the meaning of new words.</b></p> <p><b>c) Use word-reference materials.</b></p> <p><b>d) Use vocabulary from other content areas.</b></p> <p><b>e) Develop and use general and specialized vocabulary through speaking, listening, reading, and writing.</b></p>

At the fourth-grade level, students will develop and build their reading and writing skills together . ~~by writing effective narratives and explanations.~~ The student will use the writing process to plan, draft, revise, and edit writing in a variety of forms to include narrative, descriptive, opinion, and expository. They will use the writing skills of selecting and narrowing a topic, developing a plan for writing, and organizing information into several paragraphs with a central idea and supporting details. The instructional focus will include an emphasis on composing and written expression. Revising writing for clarity and editing for usage and mechanics ~~correct sentence formation, grammar, capitalization, punctuation, and spelling~~ will continue to be important skills at this grade level. ~~Students will also use available technology to write their narratives and explanations.~~ Teachers will encourage the development of writing skills that are foundational to effective written communication and critical thinking. These skills are necessary for success in future postsecondary and workplace environments.

Teacher notes:

- Teachers will model the writing process for students.
- Teachers should refer to examples of writing in mentor texts.
- The focus of writing in fourth grade is narrative, descriptive, opinion, and expository.
- Teachers will teach students to develop related paragraphs including a clear topic sentence that focuses on the main idea.
- Teachers should integrate grammar with writing instruction.
  - Teachers should use student writing to teach editing and peer editing skills. Teachers may want to consult professional publications.
- Teachers should introduce students to the three domains of writing:
  - Composing-focusing on a clear, central idea, providing elaboration and organization
  - Written Expression- sentence variation, selected vocabulary and information, and word choice
  - Usage/Mechanics- grammar, punctuation, and usage as appropriate for the grade level
- Teachers should utilize writing conferences and portfolios to monitor student progress.

4.7 The student will write in a variety of forms to include narrative, descriptive, opinion, and expository.

- a) Engage in writing as a process.
- b) Select audience and purpose.
- c) Narrow the topic.
- d) Use a variety of prewriting strategies.
- e) Recognize different forms of writing have different patterns of organization.
- f) Organize writing to convey a central idea.
- g) Write a clear topic sentence focusing on the main idea.
- h) Write related paragraphs on the same topic.
- i) Elaborate writing by including details to support the purpose.
- j) Express an opinion about a topic and provide fact-based reasons for support.
- k) Use transition words and prepositional phrases for sentence variety.
- l) Utilize elements of style, including word choice and sentence variation.
- m) Revise writing for clarity of content using specific vocabulary and information.

# English Standards of Learning CURRICULUM FRAMEWORK

**2017**

**Grade Five**

Board of Education, Commonwealth of Virginia

~~At the fifth-grade level, students will continue to refine their oral communication skills. They will further develop their ability as active listeners and as effective participants in large- and small-group activities. They will improve their skills in planning oral presentations and using grammatically correct language and specific vocabulary when delivering oral presentations, as well as including visual aids and appropriate gestures to enhance their delivery. Students will be able to summarize their presentations before delivery and summarize the presentations of others after listening to them.~~

At the fifth-grade level, students will demonstrate the ability to collaborate with diverse teams by working respectfully with others, using active listening skills, and showing value for individual contributions. Students will create and deliver interactive multimodal presentations. Students will compare/contrast a variety of techniques used in media messages. Teachers will encourage the development of effective interpersonal communication and collaboration skills that are essential for success in future postsecondary education and workplace environments.

Teacher Notes:

- Please note presentation skills may differ within classrooms.
- Teachers should explicitly teach effective presentations skills with audience involvement.
- Teachers should provide opportunities for students to create interactive multimodal presentations.
- Multimodal is the strategic use of two or more interdependent modes of communication where both modes are essential to convey the intended message. For example: graphics, written language, moving images, music, audio, presentation technologies, movement, etc.

**5.1 The student will use effective oral communication skills in a variety of settings.**

- a) Listen actively and speak using appropriate discussion rules with awareness of verbal and nonverbal cues.**
- b) Participate in and contribute to discussions across content areas.**
- c) Summarize information gathered in group activities.**
- d) Orally express ideas clearly in pairs, diverse groups, and whole class settings.**
- e) Use evidence to support opinions and conclusions.**
- f) Summarize the main points a speaker makes, and connect comments to the remarks of others.**
- g) Demonstrate the ability to collaborate with diverse teams, while sharing responsibility for the work.**
- h) Work respectfully with others and show value for individual contributions.**

At the fifth-grade level, students will become increasingly independent readers of a variety of literary forms. Strategies such as word analysis and the use of context clues and word references will help students increase fluency as well as comprehension. They will begin to read text critically in order to examine implied relationships and understandings, recognize how character and plot are developed, and formulate and justify opinions about the text. They will organize the information they extract from the text and represent their understandings on charts, maps, and graphs.

The student will continue to expand vocabulary using knowledge of roots, affixes, synonyms, antonyms, and homophones. In fifth grade, there is an emphasis on reading comprehension by comparing fiction and nonfiction texts. In fiction texts, students will explain plot development and conflict resolution and differentiate between first and third person points of view. Fifth grade students will have an increased emphasis on nonfiction reading by identifying authors' organizational patterns, and using the text to support opinions and conclusions. Teachers will encourage the development of reading skills that are foundational to effective comprehension and critical thinking. These skills are essential for success in future postsecondary education and the workplace.

Teacher Notes:

- Vocabulary words should be culled from student reading instead of using random lists and should not be taught in isolation.
  - Thematic units and cross-curricular units are effective methods to integrate multiple strands.
- Teachers must provide opportunities for silent reading with options for student choice.
- Teachers should introduce students to longer, more complex texts both on grade level and above.
- Teacher should teach figurative language using fiction and nonfiction texts.
- Teachers should teach theme as a literary term with fiction texts and main idea with nonfiction texts. However, main idea is a skill that is still essential in comprehending all texts. Please note these terms are not interchangeable.
- Please note teachers should introduce specific genres of fiction including but not limited to: fantasy, humor, fable/fairy tale, realistic fiction, historical fiction, folklore/folk tales, mythology, and mystery.
- Teachers should use fictional and informational texts paired on a common theme or topic and have students compare/contrast. Although the standard in fiction requires comparing/contrasting details in literary and informational nonfiction texts, teachers should be using paired passages with a variety of texts.
- Teachers should teach author's purpose exclusively with nonfiction texts.
- Teachers should have students write about what they have read.

**5.4 The student will expand vocabulary when reading.**

- a) Use context to clarify meaning of unfamiliar words and phrases.
- b) Use context and sentence structure to determine meanings and differentiate among multiple meanings of words.
- c) Use knowledge of roots, affixes, synonyms, antonyms, and homophones to determine the meaning of new words.
- d) Identify an author's use of figurative language.
- e) Use word-reference materials.
- f) Develop and use general and specialized content area vocabulary through speaking, listening, reading, and writing.

At the fifth-grade level, students will continue to grow develop as readers and writers as they write in a variety of forms including narrative, descriptive, expository, and persuasive. ~~to describe, to inform, to entertain, to explain, and to persuade. They will spend more time on revising and editing their work as they gain greater understanding of written expression.~~ Students will write multiparagraph compositions including evidence to inform or persuade an audience. Precise and descriptive vocabulary and varied sentence structure will become important tools for creating tone and voice within a text. Students will be expected to have greater control over the conventions of writing. Teachers will encourage the development of writing skills that are foundational to effective written communication and critical thinking. These skills are necessary for success in future postsecondary education and workplace environments. ~~including sentence formation, grammar, capitalization, spelling, and punctuation.~~

Teacher notes:

- Teachers will model the writing process for students.
- Teachers should refer to examples of writing in mentor texts.
- The focus of writing in fifth grade is narrative, descriptive, persuasive, and expository.
- Teachers should integrate grammar with writing instruction throughout the academic year.
  - Teachers should use student writing to teach editing and peer editing skills. Teachers may want to consult professional publications.
- Teachers should instruct students in the features of the three domains of writing:
  - Composing-focusing on a clear, central idea, providing elaboration, organization, and unity
  - Written Expression- sentence variation, selected information, word choice, voice, and tone
  - Usage/Mechanics- grammar, punctuation, and usage as appropriate for the grade level
- Teachers should utilize writing conferences and portfolios to monitor student progress.
- Teachers should provide the opportunity for students to have practice writing on demand, for shorter time frames, and over extended periods of time.

5.7 The student will write in a variety of forms to include narrative, descriptive, expository, and persuasive.

- a) Engage in writing as a process.
- b) Select audience and purpose.
- c) Use a variety of prewriting strategies.
- d) Introduce and develop a topic, incorporating evidence and supporting details.
- e) Organize information to convey a central idea.
- f) Recognize different forms of writing have different patterns of organization including story structure for narrative writing.
- g) Write a clear topic sentence focusing on the main idea.
- h) Clearly state a position including supporting reasons and evidence to persuade the intended audience.
- i) Write multiparagraph compositions.
- j) Use precise and descriptive vocabulary to create tone and voice.
- k) Vary sentence structure by using transition words and prepositional phrases.
- l) Revise writing for clarity of content using specific vocabulary and information.

~~At the fifth-grade level, students will conduct short research projects based on focused questions. Students will gather relevant information from sources and integrate the information while avoiding plagiarism.~~

The student will demonstrate comprehension of the research process by evaluating the relevance, reliability, and credibility of information collected. Students will learn to evaluate and synthesize information to use in their oral, visual, written, or multimodal research product. The student will understand there are consequences of plagiarism. Teachers will encourage the development of research skills that are foundational to effective critical thinking and responsible use of information. # English Standards of Learning CURRICULUM FRAMEWORK

**2017**

**Grade Six**

Board of Education, Commonwealth of Virginia

~~At the sixth-grade level, students will participate in small group and classroom discussions. They will express personal opinions and come to understand not only differing points of view but also the differences between facts and opinions. Small-group analysis and self-analysis of the effectiveness of communication will be introduced. When students speak formally and informally in small groups or individual presentations, they will be expected to use grammatically correct English. In addition, students will understand the basic elements of media literacy.~~

**At the sixth-grade level, students will demonstrate the ability to work with diverse teams working respectfully with others, participating both as a facilitator and as a contributor. Small-group analysis and self-analysis of the effectiveness of communication will be introduced. Students will continue to deliver multimodal presentations individually and in collaborative groups. Students will also interpret information presented in diverse media formats. Teachers will emphasize the importance of effective interpersonal communication and collaboration skills that are essential for success in future postsecondary education and workplace environments.**

**Teacher Notes:**

- **Please note presentation skills may differ within classrooms.**
- **Teachers should provide opportunities for students to create and deliver interactive multimodal presentations.**
- **Multimodal is the strategic use of two or more interdependent modes of communication where both modes are essential to convey the intended message. For example: graphics, written language, moving images, music, audio, presentation technologies, movement, etc.**
- **Teachers should provide opportunities for students to work in collaborative settings.**
- **Teachers should provide instruction on how to give constructive, respectful, and productive feedback.**

**6.1 The student will use effective oral communication skills in a variety of settings.**

- a) Listen actively and speak using appropriate discussion rules with awareness of verbal and nonverbal cues.**
- b) Participate as a facilitator and a contributor in a group.**
- c) Participate in collaborative discussions with partners building on others' ideas.**
- d) Ask questions to clarify the speaker's purpose and perspective.**
- e) Summarize the main points a speaker makes.**
- f) Summarize and evaluate group activities.**
- g) Analyze the effectiveness of participant interactions.**
- h) Evaluate own contributions to discussions.**
- i) Demonstrate the ability to collaborate with diverse teams.**
- j) Work respectfully with others and show value for individual contributions.**

6.2. The student will create multimodal presentations that effectively communicate ideas.

- a) Use effective verbal and nonverbal communication skills to deliver multimodal presentations.
- b) Use language and vocabulary appropriate to audience, topic, and purpose.
- c) Give collaborative and individual formal and informal interactive presentations.
- d) Paraphrase and summarize key ideas of a presentation.

At the sixth-grade level, students will expand the study of roots and affixes as well as the use of context to develop independence in vocabulary acquisition. Figurative language will be introduced. Students will read independently and in groups for appreciation and comprehension of a variety of fiction, narrative nonfiction, nonfiction, and poetry. Both classic and recent works will be included. Students will apply critical reading and reasoning skills across the content areas, including history and social science, science, and mathematics. When selecting text, teachers will consider appropriateness of subject and theme, as well as text complexity.

The student will begin the study of word origins and continue vocabulary development. There is a continued emphasis on reading comprehension by comparing fiction and nonfiction texts. In fiction texts, students will identify elements of narrative structure including identifying theme and analyzing figurative language. In sixth grade, there is an increased emphasis on nonfiction reading by creating objective summaries and drawing inferences using textual evidence. These critical thinking skills are foundational to technical reading and writing and are transferable across content areas.

Teacher Notes:

- Please note although the strands are developed separately, teachers should seamlessly integrate all strands.
  - Thematic units and cross-curricular units are effective methods to integrate multiple strands.
  - Teachers should have students write about what they have read.
- Vocabulary words should be culled from student reading instead of using random lists and should not be taught in isolation.
  - There is not a specific list of Greek and Latin roots. Teachers may want to consult professional publications.
- While whole-group instruction can be centered on a shared text, teachers should also provide opportunities for student choice with both fiction and nonfiction texts.
- Teachers should introduce students to longer, more complex texts both on grade level and above.
- Teachers should teach figurative language using fiction and nonfiction texts.
- Teachers should teach theme as a literary term with fiction texts and main idea with nonfiction texts. However, main idea is a skill that is still essential in comprehending all texts. Please note these terms are not interchangeable.
- Teachers should teach a balance of fiction including poetry and nonfiction throughout the academic year.
- Although the standard in fiction requires comparing/contrasting details in literary and informational nonfiction texts, teachers should be using paired passages with a variety of texts.
- Teachers should have students refer to the text(s) for support.
- Teachers should use fictional and informational texts paired on a common theme or topic and have students compare/contrast.

6.4 The student will read and determine the meanings of unfamiliar words and phrases within authentic texts.

- a) Identify word origins and derivations.
- b) Use roots, affixes, synonyms, and antonyms to expand vocabulary.
- c) Use context and sentence structure to determine meanings and differentiate among multiple meanings of words.
- d) Identify and analyze the construction and impact of figurative language.
- e) Use word-reference materials.
- f) Extend general and cross-curricular vocabulary through speaking, listening, reading, and writing.

At the sixth-grade level, students will continue to develop as readers and writers. The student will also plan, draft, revise, and edit writing in a variety of forms with an emphasis on narrative and reflective writing plan, draft, revise, and edit narrative, descriptive, expository, and persuasive writing with attention to composition and written expression as well as sentence formation, usage, and mechanics. Students will write multiparagraph compositions with an emphasis on the development of elaboration and unity. Additionally students will be introduced to writing thesis statements. They will use writing as a tool for learning academic concepts as well as for expressive purposes. They will use technology as available and appropriate. Students will be expected to have greater control over the conventions of writing. Teachers will emphasize the importance of effective critical thinking skills that lead to success in future postsecondary education and workplace environments.

Teacher notes:

- Teachers should recognize the difference between teaching writing and assigning writing.
- Teachers will model the recursive writing process for students.
- Teachers should refer to examples of writing in mentor texts.
- Teachers should recognize that there is not a required number of paragraphs or prescribed structure. Requiring students to use a prescribed model (i.e 5 paragraphs) often produces formulaic writing and limits student expression.
  - The focus of writing in sixth grade is narrative and reflective. Teachers may want to consult professional publications.
- Three examples of reflective writing include the following:
  - Technical – which includes what worked or did not work and why, problem-solving techniques, and theories that were used or tested.
  - Collaborative – which is centered on team dynamics; how everyone worked together and why, and what worked or did not work and why.
  - Individual - What did I learn, how did I learn it, and what could I have done better?
- Teachers should integrate grammar with writing instruction throughout the academic year.
  - Teachers should use student writing to teach editing and peer editing skills. Teachers may want to consult professional publications.
- Teachers should instruct students in the features of the three domains of writing:
  - Composing-focusing on a clear, central idea, providing elaboration, organization, and unity
  - Written Expression- sentence variation, selected information, word choice, voice, and tone
  - Usage/Mechanics- grammar, punctuation, capitalization, and usage as appropriate for the grade level
- Teachers should utilize writing conferences and portfolios to monitor student progress.
- Teachers should provide the opportunity for students to have practice writing on demand, for shorter time frames, and over extended periods of time.
- Teachers should provide opportunities for student choice with topic, audience, and purpose.

At the sixth-grade level, students will find, evaluate, and select appropriate resources for an **oral, visual, written, or multimodal** research product. They will evaluate the validity and authenticity of texts, and they will ~~use technology to research, organize, evaluate, and communicate information.~~ In addition, they will learn to cite **both primary and secondary sources** ~~sources, define the meaning and consequences of plagiarism,~~ and follow ethical and legal guidelines for gathering and using information. **Teachers will encourage the development of research skills that are foundational to effective critical thinking and responsible use of information necessary for success in future postsecondary education and workplace environments.**

**Teacher Notes:**

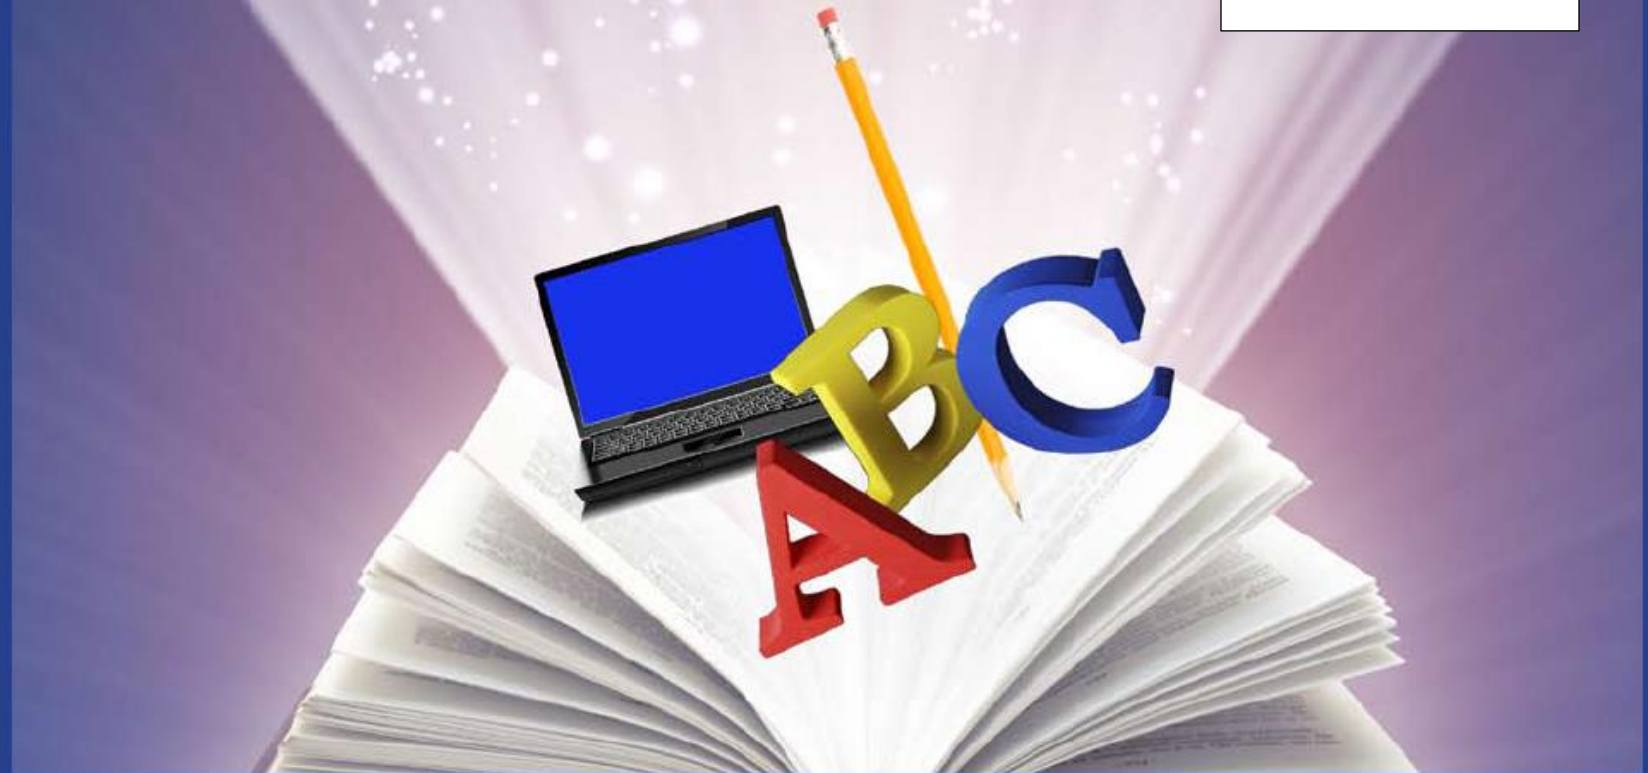

- **Teachers should note that research can be individual, collaborative, cross-curricular, and integrated throughout the year.**
- **Research products can vary from small, informative pieces to large, multimodal presentations.**
- **Teachers should utilize librarian/media specialist's assistance in teaching the research process.**
- **Teachers should make students aware of possible consequences of plagiarism.**
- **Teachers should emphasize giving credit to all sources used when gathering information including music, graphics, and another person's media.**
- **Teachers should demonstrate and encourage responsible use of the Internet.**

# English Standards of Learning CURRICULUM FRAMEWORK **2017**

**Grade Seven**

Board of Education, Commonwealth of Virginia

~~At the seventh-grade level, students will continue to develop oral communication skills and will become more aware of the effects of verbal and nonverbal behaviors in oral communications. Students will also demonstrate knowledge and understanding of persuasive/informative techniques used in media messages, including viewpoints expressed in nonprint media.~~

**At the seventh-grade level, students will continue to deliver multimodal presentations individually and in collaborative groups. Students will also interpret information presented in diverse media formats. Students share responsibility for collaborative work, as both a contributor and a facilitator, while working for consensus to accomplish goals. Teachers will emphasize the importance of effective interpersonal communication and collaboration skills that are essential for success in future postsecondary education and workplace environments.**

**Teacher Notes:**

- **Please note presentation skills may differ within classrooms.**
- **Teachers should provide opportunities for students to create interactive multimodal presentations.**
- **Multimodal is the strategic use of two or more interdependent modes of communication where both modes are essential to convey the intended message. For example: graphics, written language, moving images, music, audio, presentation technologies, movement, etc.**

<p><b>7.1 The student will participate in and contribute to conversations, group discussions, and oral presentations.</b></p> <p><b>a) Use a variety of strategies to listen actively and speak using agreed upon discussion rules with awareness of verbal and nonverbal cues.</b></p> <p><b>b) Clearly communicate ideas and information orally in an organized and succinct manner.</b></p> <p><b>c) Ask probing questions to seek elaboration and clarification of ideas.</b></p> <p><b>d) Participate in collaborative discussions with partners building on others' ideas.</b></p> <p><b>e) Make statements to communicate agreement or tactful disagreement with others' ideas.</b></p> <p><b>f) Use language and style appropriate to audience, topic, and purpose.</b></p> <p><b>g) Give formal and informal presentations in a group or individually, providing evidence to support a main idea.</b></p> <p><b>h) Work effectively and respectfully within diverse groups.</b></p> <p><b>i) Exhibit willingness to make necessary compromises to accomplish a goal.</b></p> <p><b>j) Share responsibility for collaborative work.</b></p>

At the seventh-grade level, students will continue the study of roots and affixes for vocabulary development and continue to study figurative language. Connotations will be introduced. They will read and understand information from various sources including a variety of fiction, nonfiction, and poetry. They will continue to read for appreciation and comprehension in both classic and recent works. Students will apply critical reading and reasoning skills across the content areas, including history and social science, science, and mathematics. When selecting texts, teachers will consider appropriateness of subject and theme as well as text complexity.

The student will continue the study of word origins and roots and begin identifying connotations. There is a continued emphasis on reading comprehension by comparing fiction and nonfiction texts. In fiction texts, students will identify elements of a variety of genres while focusing on an author's style. In seventh grade, there is an increased emphasis on nonfiction reading, and students will identify the source, point-of-view, and purpose of texts. These critical thinking skills are foundational to technical reading and writing and are transferable across content areas.

Teacher Notes:

- Please note although the strands are developed separately, teachers should seamlessly integrate all strands.
  - Thematic units are one approach.
  - Teachers should have students write about what they have read.
- Vocabulary words should be culled from student reading instead of using random lists and should not be taught in isolation.
  - There is not a specific list of Greek and Latin roots. Teachers may want to consult professional publications
  - Teachers should provide instruction on word connotations and how they can change meaning of the text.
- While whole-group instruction can be centered on a shared text, teachers should also provide opportunities for student choice with both fiction and nonfiction texts.
- Teachers should introduce students to longer, more complex texts both on grade level and above.
- Teachers should teach figurative language using fiction and nonfiction texts.
- Teachers should teach a balance of fiction including poetry and nonfiction throughout the academic year.
- Although the standard in fiction requires comparing/contrasting details in literary and informational nonfiction texts, teachers should be using paired passages with a variety of texts.
- Teachers should have students refer to the text(s) for support.
- Teachers should use fictional and informational texts paired on a common theme or topic and have students compare/contrast.

At the seventh-grade level, students will continue to develop as readers and writers. The student will also plan, draft, revise, and edit writing in a variety of forms with an emphasis on expository and persuasive writing. Students will write to develop and modify a central idea, tone, and voice to fit the audience and purpose. At the seventh-grade level, students will plan, draft, revise, and edit expository as well as narrative and persuasive pieces with attention to composition and written expression. Students will achieve greater independence with sentence formation, usage, and mechanics and understand that the conventions of language help convey the message from the writer to the reader. Students will use writing for expressive purposes and as a tool for learning academic concepts. They will use available and appropriate technology. Students will write multiparagraph compositions with an emphasis on organization. Additionally students will write thesis statements that clearly state a position. Students will be expected to have greater control over the conventions of writing. Teachers will emphasize the importance of effective critical thinking skills that lead to success in future postsecondary education and workplace environments.

Teacher notes:

- Teachers should recognize the difference between teaching writing and assigning writing.
- Teachers should recognize that there is not a required number of paragraphs or prescribed structure. Requiring students to use a prescribed model (i.e. 5 paragraphs) often produces formulaic writing and limits student expression.
- Teachers will model the recursive writing process for students.
- Teachers should refer to examples of writing in mentor texts.
- The focus of writing in seventh grade is expository and persuasive.
- Teachers should integrate grammar with writing instruction throughout the academic year.
  - Teachers should use student writing to teach editing and peer editing skills. Teachers may want to consult professional publications.
- Teachers should instruct students in the features of the three domains of writing:
  - Composing-focusing on a clear, central idea, providing elaboration, organization, and unity
  - Written Expression- sentence variation, selected information, word choice, voice, and tone
  - Usage/Mechanics- grammar, punctuation, and usage as appropriate for the grade level
- Teachers should utilize writing conferences and portfolios to monitor student progress.
- Teachers should provide the opportunity for students to have practice writing on demand, for shorter time frames, and over extended periods of time.
- Teachers should provide opportunities for student choice with topic, audience, and purpose.

**7.7 The student will write in a variety of forms to include narrative, expository, persuasive, and reflective with an emphasis on expository and persuasive writing.**

- a) Engage in writing as a recursive process.
- b) Choose intended audience and purpose.
- c) Use a variety of prewriting strategies to generate and organize ideas.
- d) Organize writing structure to fit form or topic.
- e) Establish a central idea incorporating evidence, while maintaining an organized structure and a formal style.
- f) Compose a thesis statement for persuasive writing that includes a position.
- g) Clearly state a position and organize reasons and evidence, using credible sources.
- h) Distinguish between fact and opinion to support a position.
- i) Write multiparagraph compositions with elaboration and unity.
- j) Use transition words and phrases within and between paragraphs.
- k) Develop and modify the central idea, tone, and voice to fit the audience and purpose.
- l) Expand and embed ideas by using modifiers, standard coordination, and subordination in complete sentences.
- m) Use clauses and phrases for sentence variety.
- n) Revise writing for clarity of content including specific vocabulary and information.

~~At the seventh-grade level, students will apply knowledge of appropriate reference material to produce a research product including the collection and organization of information from multiple online, print, and media sources. They will extend skills in the evaluation of sources and the use of technology to research, organize, evaluate, and communicate information. In addition, they will continue to cite sources skillfully and thereby avoid plagiarism.~~

At the seventh-grade level, students will find, evaluate, and select appropriate resources for an oral, visual, written, or multimodal research product. They will evaluate the validity and authenticity of sources, and they will apply research techniques to quote, summarize, and paraphrase findings. In addition, they will learn to cite both primary and secondary sources and follow ethical and legal guidelines for gathering and using information. Teachers will encourage the development of research skills that are foundational to effective critical thinking and responsible use of information necessary for success in future postsecondary education and workplace environments.

Teacher Notes:

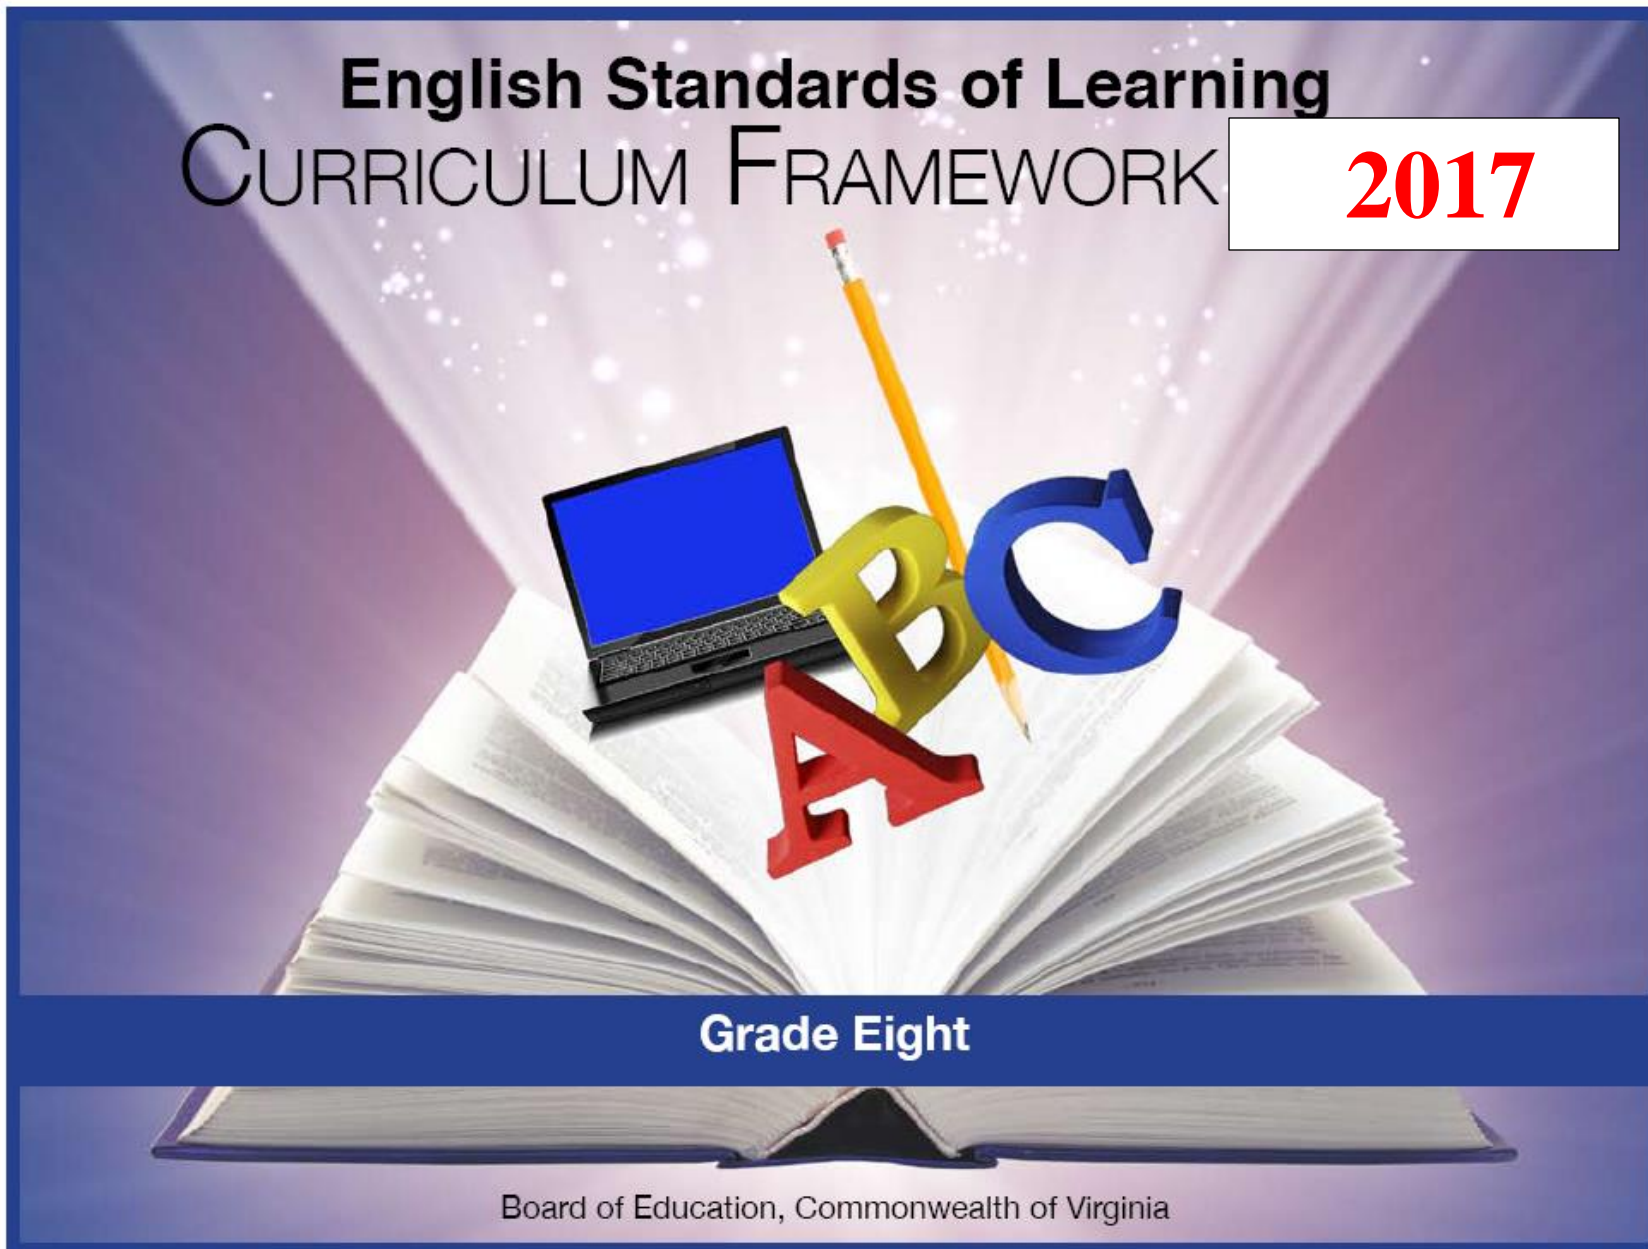

- Teachers should note that research can be individual, collaborative, cross-curricular, and integrated throughout the year.
- Research products can vary from small informative pieces to large multimodal presentations.
- Teachers should utilize librarian/media specialist's assistance in teaching the research process.
- Teachers should make students aware of possible consequences of plagiarism.
- Teachers should emphasize giving credit to all sources used when gathering information including music, graphics, and another person's media.
- Teachers should demonstrate and encourage responsible use of the Internet.

# English Standards of Learning CURRICULUM FRAMEWORK

**2017**

**Grade Eight**

Board of Education, Commonwealth of Virginia

~~At the eighth-grade level, students will learn to apply interviewing techniques. Preparation for and evaluation of the process of interviewing will be a part of student learning. Interviewing skills will be added to the students' repertoire of oral language skills. In addition, students will analyze, develop, and produce creative and informational media messages.~~

**In eighth-grade, students will evaluate, analyze, develop, and produce media messages. Students will create multimodal presentations that include different points-of-view, and collaborate with others to exchange ideas, make decisions, and solve problems. Teachers will emphasize the importance of effective interpersonal communication and collaboration skills that are essential for success in future postsecondary education and workplace environments.**

**Teacher Notes:**

- **Please note presentation skills may differ within classrooms.**
- **Teachers should provide opportunities for students to create interactive multimodal presentations.**
- **Teachers should note that the communication strand should be integrated throughout the year and can be used as part of reading, writing, and research.**
- **Multimodal is the strategic use of two or more interdependent modes of communication where both modes are essential to convey the intended message. For example: graphics, written language, moving images, music, audio, presentation technologies, movement, etc.**

<p><b>8.1 The student will participate in, collaborate in, and report on small-group learning activities.</b></p> <p>a) Assume responsibility for specific group tasks and share responsibility for collaborative work within diverse teams.</p> <p>b) Exhibit willingness to make necessary compromises to accomplish a goal.</p> <p>c) Collaborate with others to exchange ideas, develop new understandings, make decisions, and solve problems.</p> <p>d) Include all group members, and value individual contributions made by each group member.</p> <p>e) Make statements to communicate agreement or tactful disagreement with others' ideas.</p> <p>f) Use a variety of strategies to listen actively and speak using appropriate discussion rules with awareness of verbal and nonverbal cues.</p> <p>g) Use self-reflection to evaluate one's own role in preparation and participation in small-group activities.</p>

At the eighth-grade level, students will apply knowledge of word origins, analogies, and figurative language to understand unfamiliar or new words encountered in authentic texts. They will continue to develop appreciation of literature through the study of literary elements in classic and contemporary selections. They will describe themes and inferred main ideas, interpret cause-effect relationships, and draw conclusions from a variety of literary and informational selections. Students will build on the foundations for literacy developed in the previous grades. When selecting texts, teachers will consider appropriateness of subject and theme as well as text complexity. Students will apply critical reading and reasoning skills across the content areas, including history and social science, science, and mathematics.

The student will continue the study of word origins, roots, connotations, and denotations. There is a continued emphasis on reading comprehension by comparing fiction and nonfiction texts. In fiction texts, students will explain the development of theme(s), and compare/contrast authors' styles. There will be an increased emphasis on nonfiction reading, and students will analyze authors' qualifications, point-of-view, and style. These critical thinking skills are foundational to technical reading and writing and are transferable across all content areas.

Teacher Notes:

- Please note although the strands are developed separately, teachers should seamlessly integrate all strands.
  - Thematic units are one approach.
  - Teachers should have students write about what they have read.
- Vocabulary words should be culled from student reading instead of using random lists and should not be taught in isolation.
  - There is not a specific list of Greek/Latin roots, or idioms. Teachers may want to consult professional publications.
  - Teachers should provide instruction on word connotations and how they can change meaning of the text.
- While whole-group instruction can be centered on a shared text, teachers should also provide opportunities for student choice with both fiction and nonfiction texts.
- Teachers should introduce students to longer, more complex texts both on grade level and above.
- Teachers should teach figurative language using fiction and nonfiction texts.
- Teachers should teach a balance of fiction including poetry and nonfiction throughout the academic year.
- Although the standard in fiction requires comparing/contrasting details in literary and informational nonfiction texts, teachers should be using paired passages with a variety of texts.
- Teachers should have students refer to the text(s) for support.
- Teachers should use fictional and informational texts paired on a common theme or topic and have students compare/contrast.

At the eighth-grade level, students will plan, draft, revise, and edit narratives as well as expository, persuasive, and informational pieces with attention to composition and written expression. Students will continue the process of becoming independent with sentence formation, usage, and mechanics and understand that the conventions of language help convey the message from the writer to the reader. Students will use writing for expressive purposes and as a tool for learning academic concepts. They will use available and appropriate technology.

At the eighth-grade level, students will continue to develop as readers and writers. The student will also plan, draft, revise, and edit writing in a variety of forms with an emphasis on expository and persuasive writing. Students will write persuasively and use claims, evidence, and counterclaims to advocate and support a position to fit the audience and purpose. Students will be expected to have greater control over the conventions of writing. Teachers will emphasize the importance of effective critical thinking skills that lead to success in future postsecondary education and workplace environments.

Teacher notes:

- Teachers should recognize the difference between teaching writing and assigning writing.
- Teachers should recognize that there is not a required number of paragraphs or prescribed structure. Requiring students to use a prescribed model (i.e 5 paragraphs) often produces formulaic writing and limits student expression.
- Teachers will model the recursive writing process for students.
- Teachers should refer to examples of writing in mentor texts.
- The focus of writing in eighth grade is expository and persuasive.
- Teachers should integrate grammar with writing instruction throughout the academic year.
  - Teachers should use student writing to teach editing and peer editing skills. Teachers may want to consult professional publications.
- Teachers should instruct students in the features of the three domains of writing:
  - Composing-focusing on a clear, central idea, providing elaboration, organization, and unity
  - Written Expression- sentence variation, selected information, word choice, voice, and tone
  - Usage/Mechanics- grammar, punctuation, and usage as appropriate for the grade level
- Teachers should utilize writing conferences and portfolios to monitor student progress.
- Teachers should provide the opportunity for students to have practice writing on demand, for shorter time frames, and over extended periods of time.
- Teachers should provide opportunities for student choice with topic, audience, and purpose.

~~At the eighth-grade level, students will apply knowledge of appropriate reference material to produce a research product including the collection and organization of information from multiple online, print, and media sources. They will extend skills in the evaluation of sources and the use of technology to research, organize, evaluate, and communicate information. In addition, they will continue to cite sources and avoid plagiarism by using Modern Language Association (MLA) or American Psychological Association (APA) style guidelines.~~

At the eighth-grade level, students will apply research techniques to analyze information gathered from diverse sources by identifying misconceptions and possible bias. They will evaluate the validity and credibility of sources, and they will apply research techniques to quote, summarize, and paraphrase findings. In addition, they will learn to cite sources using either MLA or APA style sheet and follow ethical and legal guidelines for gathering and using information. Teachers will encourage the development of research skills that are foundational to effective critical thinking and responsible use of information necessary for success in future postsecondary education and workplace environments.

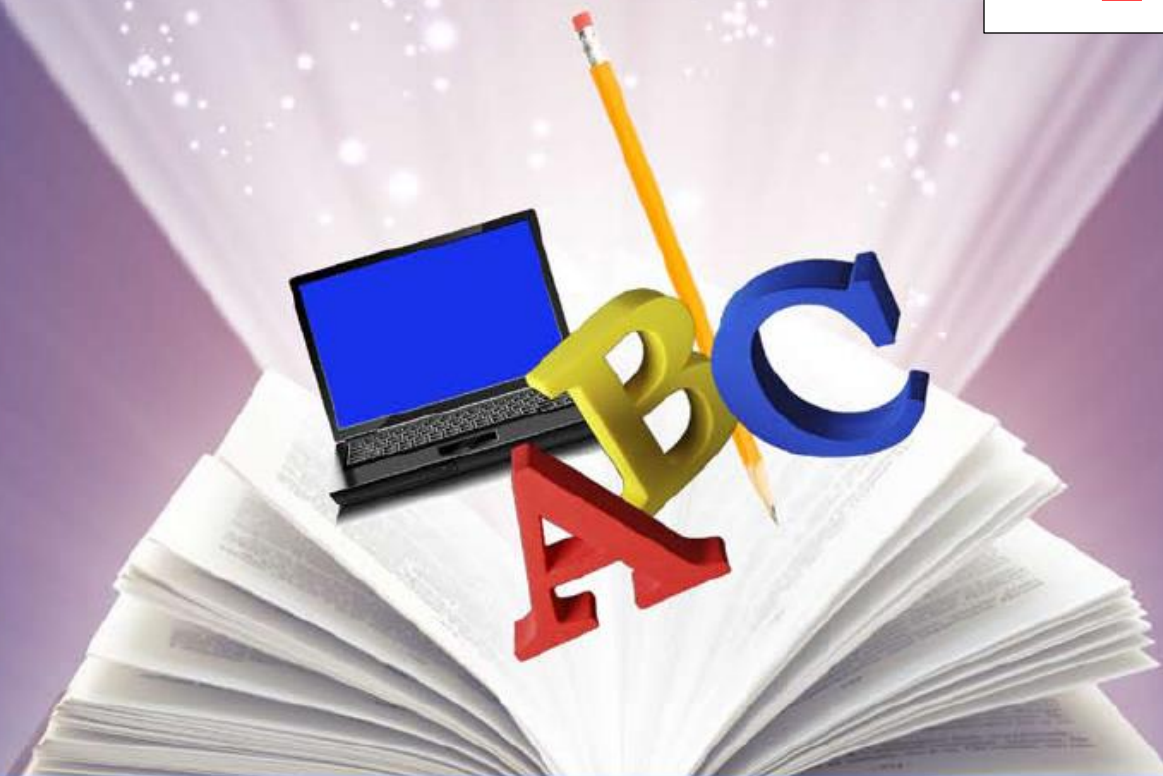

Teacher Notes:

- Teachers should note that research can be individual, collaborative, cross-curricular, and integrated throughout the year.
- Research products can vary from small informative pieces to large multimodal presentations.
- Teachers should utilize librarian/media specialist's assistance in teaching the research process.
- Teachers should make students aware of possible consequences of plagiarism.
- Teachers should emphasize giving credit to all sources used when gathering information including music, graphics, and another person's media.
- Teachers should demonstrate and encourage responsible use of the Internet.

# English Standards of Learning CURRICULUM FRAMEWORK **2017**

**Grade Nine**

Board of Education, Commonwealth of Virginia

~~At the ninth-grade level, students will develop interpersonal communication skills as well as those skills required for more formal public speaking opportunities. They will continue to develop proficiency in making planned oral presentations independently and in small groups. They will continue to develop media literacy by producing, analyzing, and evaluating auditory, visual, and written media messages.~~

**Students will analyze and interpret the social, commercial, and/or political motives behind media messages. Students will use multimodal tools to create presentations both independently and in small groups. Teachers will emphasize the importance of effective interpersonal communication and collaboration skills that are essential for success in future postsecondary education and workplace environments.**

**Teacher Notes:**

- **Please note presentation skills may differ within classrooms.**
- **Teachers should provide opportunities for students to create interactive multimodal presentations.**
- **Teachers should provide opportunities for small-group analysis and self-analysis of the effectiveness of communication.**
- **Teachers should note that the communication strand should be integrated throughout the year and can be used as part of reading, writing, and research.**
- **Multimodal is the strategic use of two or more interdependent modes of communication where both modes are essential to convey the intended message. For example: graphics, written language, moving images, music, audio, presentation technologies, movement, etc.**

<p><b>9.1 The student will participate in, collaborate in, and make multimodal presentations both independently and in small groups.</b></p> <p>a) Make strategic use of multimodal tools.</p> <p>b) Credit information sources.</p> <p>c) Use vocabulary appropriate to the topic, audience, and purpose.</p> <p>d) Assist with setting rules for group work including informal consensus, taking votes on key issues, presentation of alternate views and goal setting.</p> <p>e) Assume responsibility for specific group tasks.</p> <p>f) Share responsibility for collaborative work.</p> <p>g) Use a variety of strategies to listen actively and speak using appropriate discussion rules with awareness of verbal and nonverbal cues.</p> <p>h) Include all group members, acknowledge new information expressed by others, and value individual contributions made by each group member.</p> <p>i) Respond thoughtfully and tactfully to diverse perspectives, summarizing points of agreement and disagreement.</p> <p>j) Evaluate impact, purpose, point of view, reasoning, and use of evidence and rhetoric of presentation(s).</p> <p>k) Use self-reflection to evaluate one's own role in preparation and participation in small-group activities.</p>

At the ninth-grade level, students will apply knowledge of word origins, derivations, and figurative language to extend vocabulary development in authentic texts. They will be introduced to literary works from a variety of cultures and eras, and they will apply knowledge of literary terms and forms to their reading and writing and to analyses of literature and other printed materials. Students will continue to develop their reading comprehension skills through utilizing strategies to identify formats, text structures, and main ideas. They will apply these skills across the content areas, including history and social science, science, and mathematics. When selecting texts, teachers will consider appropriateness of subject and theme as well as text complexity.

The student will continue to expand vocabulary using the structural analysis of roots and affixes to understand complex words. There is a continued emphasis on reading comprehension by comparing fiction and nonfiction texts. In fiction texts, students will apply knowledge of literary terms and analyze a variety of genres. In ninth grade there will be an increased emphasis on nonfiction reading, and students will make inferences and draw conclusions using explicit and implied textual evidence. These critical thinking skills are foundational to technical reading and writing and are transferable across all content areas.

Teacher Notes:

- Teachers should teach a balance of fiction including poetry and nonfiction throughout the academic year.
  - Nonfiction texts should include informational, persuasive, and technical texts.
- Please note although the strands are developed separately, teachers should seamlessly integrate all strands.
  - Thematic units are one approach.
  - Teachers should have students write about what they have read.
- Vocabulary words should be culled from student reading instead of using random lists and should not be taught in isolation.
  - Although the vocabulary standards in high school remain similar, the words studied should increase in complexity according to a variety of texts read. Students in 9<sup>th</sup> grade should not be studying the same vocabulary as upper classmen will receive. Vocabulary can also be differentiated according to text and level of student.
  - There is not a specific list of Greek/Latin roots, or idioms. Teachers may want to consult professional publications.
  - Teachers should provide instruction on classical allusions and how they can impact and deepen the meaning of the text.
- While whole-group instruction can be centered on a shared text, teachers must also provide opportunities for student choice with both fiction and nonfiction texts.
- Although the standard in fiction requires comparing/contrasting details in literary and informational nonfiction texts, teachers should be using paired passages with a variety of texts.
- Teachers should include literary texts that fulfill a social or cultural function depending on the time, location, theme and purpose of the author(s) across texts. For example, *To Kill a Mockingbird*, reflects the time of the Civil Rights Movement that compelled people to examine their social perspectives, prejudices, and attitudes resulting in a change in the conscience and laws of a nation.
- Teachers should introduce students to longer, more complex texts both on grade level and above.
- Teachers should have students refer to the text(s) for support.
- Teachers should use fictional and informational texts paired on a common theme or topic and have students compare/contrast.

~~At the ninth-grade level, students will write narrative, expository, and persuasive forms with an emphasis on analysis. As in every grade, daily writing experiences are essential for all ninth-grade students, and they will demonstrate their understanding through written products. They will develop as writers by participating in a process for writing, including prewriting, organizing, composing, revising, editing, and publishing. Students will edit writings for correct grammar, capitalization, punctuation, spelling, sentence structure, and paragraphing.~~

At the ninth-grade level, students will continue to develop as readers and writers. The student will use the recursive writing process while writing in a variety of forms with an emphasis on analysis and persuasion. Students will write persuasively and analytically using evidence from credible sources and organizational patterns to effectively match the intended audience and purpose. Students will be expected to have greater control over the conventions of writing.

Teacher notes:

- Teachers should recognize the difference between teaching writing and assigning writing.
- Teachers should recognize that there is not a required number of paragraphs or prescribed structure. Requiring students to use a prescribed model (i.e 5 paragraphs) often produces formulaic writing and limits student expression.
- Teachers will model the recursive writing process for students, including the use of anchor texts that would be acceptable to both postsecondary education and the workplace.
- Teachers should refer to examples of writing in mentor texts.
- The focus of writing in ninth grade is persuasion and analysis.
- Teachers should integrate grammar with writing instruction throughout the academic year.
- Teachers should use student writing to teach editing and peer editing skills.
- Teachers should teach students to blend multiple forms of writing and embed narrative techniques.
  - Teachers may want to consult professional publications.
- Teachers should instruct students in the features of the three domains of writing:
  - Composing-focusing on a clear, central idea, providing elaboration, organization, and unity
  - Written Expression- sentence variation, selected information, word choice, voice, and tone
  - Usage/Mechanics- grammar, punctuation, and usage as appropriate for the grade level
- Teachers should utilize writing conferences and portfolios to monitor student progress.
- Teachers should provide the opportunity for students to have practice writing on demand, for shorter time frames, and over extended periods of time.
- Teachers should provide opportunities for student choice with topic, audience, and purpose.

~~At the ninth-grade level, students will develop skills in using print, electronic databases, online resources, and other media to access information and create a research product. Students will verify the validity of all information and follow ethical and legal guidelines for using and gathering information. They will use a standard style method to credit sources of ideas used and will demonstrate clear understanding of grammatical conventions through the application of rules for correct use of language, spelling, and mechanics.~~

At the ninth-grade level, students will apply research techniques to analyze information gathered from diverse sources by identifying misconceptions and possible bias. Students will evaluate the validity and authenticity of sources, and students will apply research techniques to quote, summarize, paraphrase, and embed findings. In addition, students will learn to cite sources using either MLA or APA style sheet and follow ethical and legal guidelines for gathering and using information. Teachers will encourage the development of research skills that are foundational to effective critical thinking and responsible use of information necessary for success in future postsecondary education and workplace environments.

Teacher Notes:

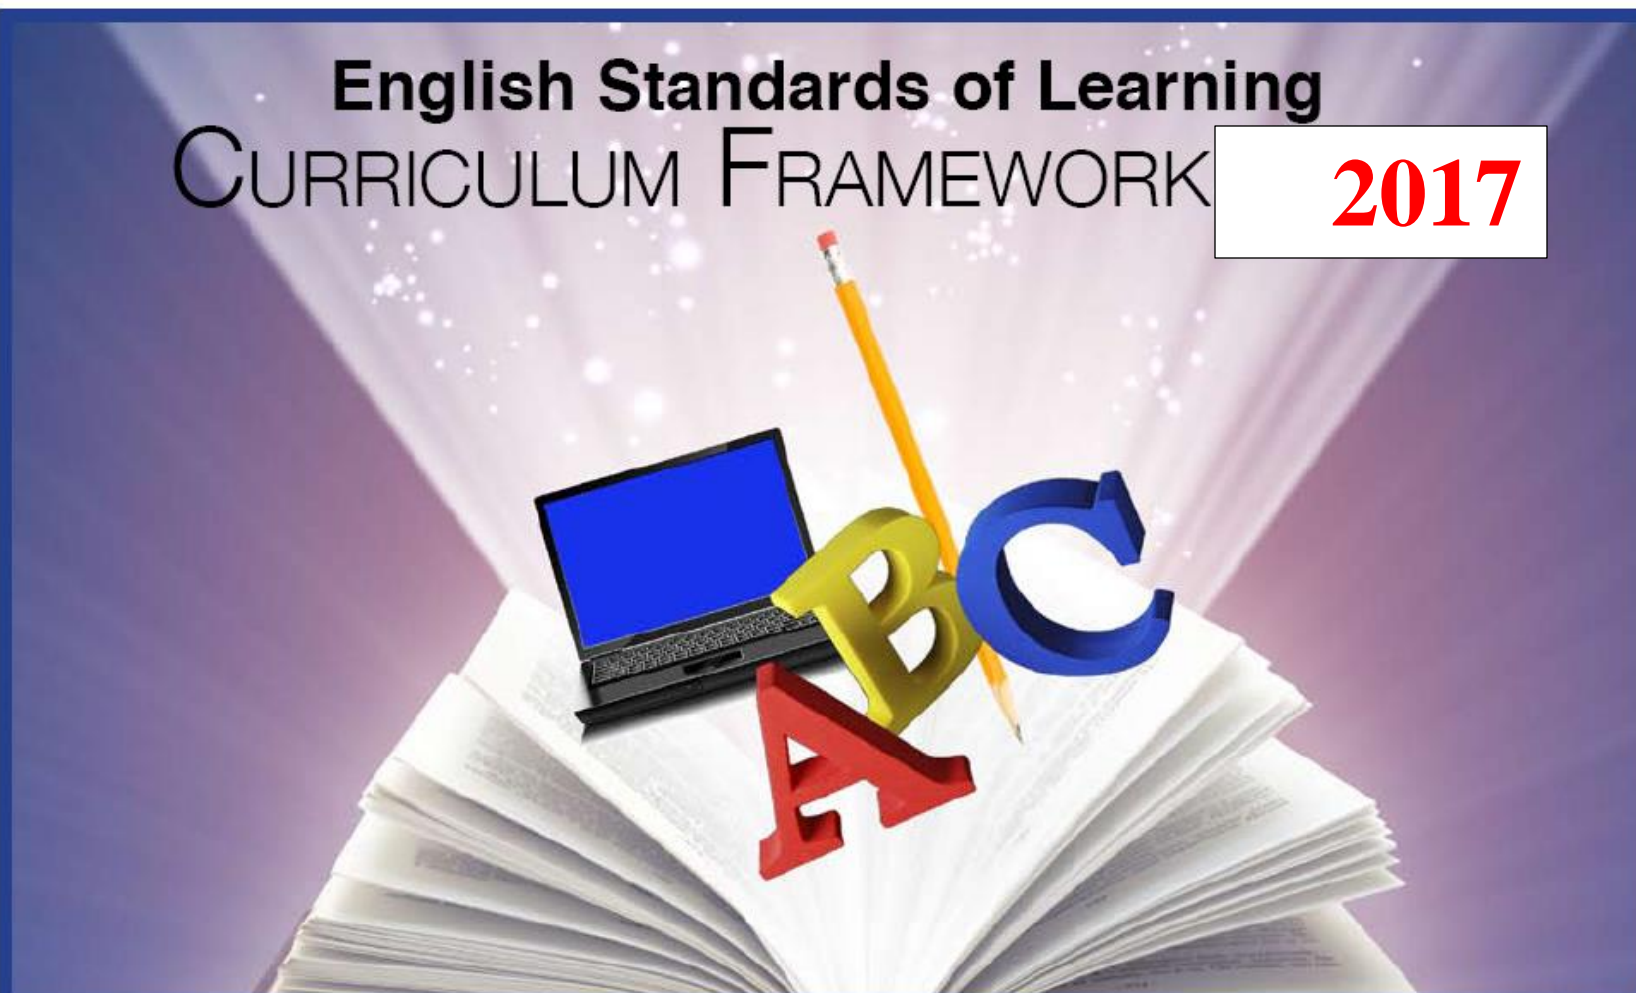

- Teachers should note that research can be individual, collaborative, cross-curricular, and integrated throughout the year.
- Research products can vary from small informative pieces to large multimodal presentations.
- Teachers will teach students how to embed information correctly into research products.
- Teachers should utilize librarian/media specialist's assistance in teaching the research process.
- Teachers will make students aware of possible consequences of plagiarism.
- Teachers should emphasize giving credit to all sources used when gathering information including music, graphics, and another person's media.
- Teachers will have students demonstrate responsible use of the Internet.

# English Standards of Learning CURRICULUM FRAMEWORK

**2017**

**Grade Ten**

Board of Education, Commonwealth of Virginia

~~At the tenth-grade level, students will become skilled communicators in small-group learning activities. Students will participate in, collaborate in, and report on small-group learning activities. They will also examine and critique the overall effectiveness of the group process. They will use grammatically correct language that is appropriate to the topic, audience, and purpose. In addition, students will analyze, produce, and examine similarities and differences between visual and verbal media messages.~~

**The student will create media messages and analyze the cause and effect relationships between mass media coverage and public opinion trends. Students will continue to use multimodal tools to create presentations both independently and in small groups. The tenth-grade student will continue to become a skilled communicator, working both independently and in collaborative groups while presenting alternate views and working toward common goals. Teachers will emphasize the importance of effective interpersonal communication and collaboration skills that are essential for success in future postsecondary education and workplace environments.**

**Teacher Notes:**

- **Please note presentation skills may differ within classrooms.**
- **Teachers should provide opportunities for students to create interactive multimodal presentations.**
- **Teachers should provide opportunities for small-group analysis and self-analysis of the effectiveness of communication.**
- **Teachers should provide opportunities for students to collaborate to solve problems.**
- **Teachers should note that the communication strand should be integrated throughout the year and can be used as part of reading, writing, and research.**
- **Multimodal is the strategic use of two or more interdependent modes of communication where both modes are essential to convey the intended message. For example: graphics, written language, moving images, music, audio, presentation technologies, movement, etc.**

<p><b>10.1 The student will make planned multimodal, interactive presentations collaboratively and individually.</b></p> <p>a) Make strategic use of multimodal tools.</p> <p>b) Credit information sources.</p> <p>c) Demonstrate the ability to work effectively with diverse teams including setting rules and goals for group work such as coming to informal consensus, taking votes on key issues, and presenting alternate views.</p> <p>d) Assume responsibility for specific group tasks.</p> <p>e) Include all group members and value individual contributions made by each group member.</p> <p>f) Use a variety of strategies to listen actively and speak using appropriate discussion rules with awareness of verbal and nonverbal cues.</p> <p>g) Respond thoughtfully and tactfully to diverse perspectives, summarizing points of agreement and disagreement.</p> <p>h) Choose vocabulary, language, and tone appropriate to the topic, audience, and purpose.</p> <p>i) Access, critically evaluate, and use information accurately to solve problems.</p> <p>j) Use reflection to evaluate one's own role and the group process in small-group activities.</p> <p>k) Evaluate a speaker's point of view, reasoning, use of evidence, rhetoric, and identify any faulty reasoning.</p>

At the tenth-grade level, students will apply knowledge of word origins, derivations, and figurative language to extend vocabulary development in authentic texts. They will read, comprehend, critique, and analyze a variety of literary works from various cultures and eras. They will interpret nonfiction materials. Students will learn to apply critical reading skills across the content areas, including history and social science, science, and mathematics. When selecting texts, teachers will consider appropriateness of subject and theme as well as text complexity.

The student will continue development of vocabulary, with attention to connotations, idioms, classical allusions, and figurative language. There is a sustained emphasis on reading comprehension by comparing fiction and nonfiction texts. Students will analyze the cultural and social function and universal themes of fictional texts from different cultures. Tenth grade students will analyze and synthesize information from nonfiction texts to solve problems, answer questions, and generate new knowledge. These critical thinking skills are foundational to technical reading and writing and are transferable across all content areas. \*The bodies of literature for grades 10, 11, and 12 are interchangeable and may be taught in any of these grades.\*

Teacher Notes:

- Teachers should teach a balance of fiction including poetry and nonfiction throughout the academic year.
  - Nonfiction texts should include informational, persuasive, and technical texts.
- Please note although the strands are developed separately, teachers should seamlessly integrate all strands.
  - Thematic units are one approach.
  - Teachers should have students write about what they have read.
- Vocabulary words should be culled from student reading instead of using random lists and should not be taught in isolation.
  - Although the vocabulary standards in high school remain similar, the words studied should increase in complexity according to a variety of texts read. Vocabulary can also be differentiated according to text, and level of student.
  - There is not a specific list of Greek/Latin roots, or idioms. Teachers may want to consult professional publications.
  - Teachers should provide instruction on classical allusions and how they can impact and deepen the meaning of the text.
- While whole-group instruction can be centered on a shared text, teachers must also provide opportunities for student choice with both fiction and nonfiction texts.
- Although the standard in fiction requires comparing/contrasting details in literary and informational nonfiction texts, teachers should be using paired passages with a variety of texts.
- A list of poetic elements and techniques and literary devices is included in the Essential Knowledge, Skills, and Processes column for English SOL 9.4.
- Teachers should include literary texts that fulfill a social or cultural function depending on the time, location, theme and purpose of the author(s) across texts. For example, *Things Fall Apart*, focuses on the clash of cultures in an African country centered on a prodigal son brought down by hubris.
- Teachers should introduce students to longer, more complex texts both on grade level and above.
- Teachers should have students refer to the text(s) for support.
- Teachers should use fictional and informational texts paired on a common theme or topic and have students compare/contrast.

At the tenth-grade level, students will develop their persuasive, expository, and analytical writing skills. They will synthesize information to support a thesis, provide elaboration, and organize ideas logically. They will demonstrate understanding by applying a writing process in developing written products. They will revise writing for clarity of content and edit for correct use of language, sentence formation, punctuation, capitalization, and spelling as part of the writing process.

At the tenth-grade level, students will continue to develop as readers and writers. The student will use the recursive writing process while writing in a variety of forms with an emphasis on analysis and persuasion. Students will write persuasively and analytically synthesizing evidence from credible sources and use organizational patterns to effectively match the intended audience and purpose. Students will be expected to have greater control over the conventions of writing and write and revise to a standard acceptable both in the workplace and postsecondary education.

Teacher notes:

- The focus of writing in tenth grade is persuasion and analysis.
- Teachers should recognize the difference between teaching writing and assigning writing.
- Teachers should recognize that there is not a required number of paragraphs or prescribed structure. Requiring students to use a prescribed model (i.e. 5 paragraphs) often produces formulaic writing and limits student expression.
- Teachers will model the recursive writing process for students.
- Teachers should reference quality writing in published works as models.
- The focus of writing in tenth grade is persuasion and analysis.
- Teachers will integrate grammar with writing instruction throughout the academic year.
- Teachers will use student writing to teach editing and peer editing skills.
- Teachers will teach students to blend multiple forms of writing and embed narrative techniques.
  - Teachers may want to consult professional publications.
- Teachers will instruct students in the features of the three domains of writing:
  - Composing-focusing on a clear, central idea, providing elaboration, organization, and unity
  - Written Expression- sentence variation, selected information, word choice, voice, and tone
  - Usage/Mechanics- grammar, punctuation, and usage as appropriate for the grade level
- Teachers will utilize writing conferences and portfolios to monitor student progress.
- Teachers will provide the opportunity for students to have practice writing on demand, for shorter time frames, and over extended periods of time.
- Teachers should provide opportunities for student choice with topic, audience, and purpose.

**10.6 The student will write in a variety of forms to include persuasive, reflective, interpretive, and analytic with an emphasis on persuasion and analysis.**

- a) Engage in writing as a recursive process.
- b) Plan and organize writing to address a specific audience and purpose.
- c) Adjust writing content, technique, and voice for a variety of audiences and purposes.
- d) Communicate clearly the purpose of the writing using a thesis statement.
- e) Objectively introduce and develop topics, incorporating evidence and maintaining an organized structure and a formal style.
- f) Compose a thesis statement for persuasive writing that advocates a position.
- g) Clearly state and defend a position using reasons and sufficient evidence from credible sources as support.
- h) Identify counterclaims and provide counter - arguments.
- i) Show relationships among claims, reasons, and evidence and include a conclusion that follows logically from the information presented.
- j) Blend multiple forms of writing including embedding a narrative to produce effective essays.
- k) Elaborate ideas clearly through word choice.
- l) Use textual evidence to compare and contrast multiple texts.
- m) Revise writing for clarity of content, accuracy, and depth of information.
- n) Write and revise to a standard acceptable both in the workplace and in postsecondary education.

~~At the tenth-grade level, students will develop skills in accessing, evaluating, organizing, and presenting information in the research process. Students will verify the validity of all information and follow ethical and legal guidelines for using and gathering information. They will also credit sources for quoted and paraphrased information, using a standard method of documentation. Students will present writing in a format appropriate for audience and purpose.~~

At the tenth-grade level, students will apply research techniques to analyze information gathered from diverse sources by identifying misconceptions and possible bias. They will evaluate the validity and authenticity of sources, and they will apply research techniques to quote, summarize, paraphrase, and embed findings. In addition, they will cite sources using either MLA or APA style sheet and follow ethical and legal guidelines for gathering and using information. Teachers will encourage the development of research skills that are foundational to effective critical thinking and responsible use of information necessary for success in future postsecondary education and workplace environments.

Teacher Notes:

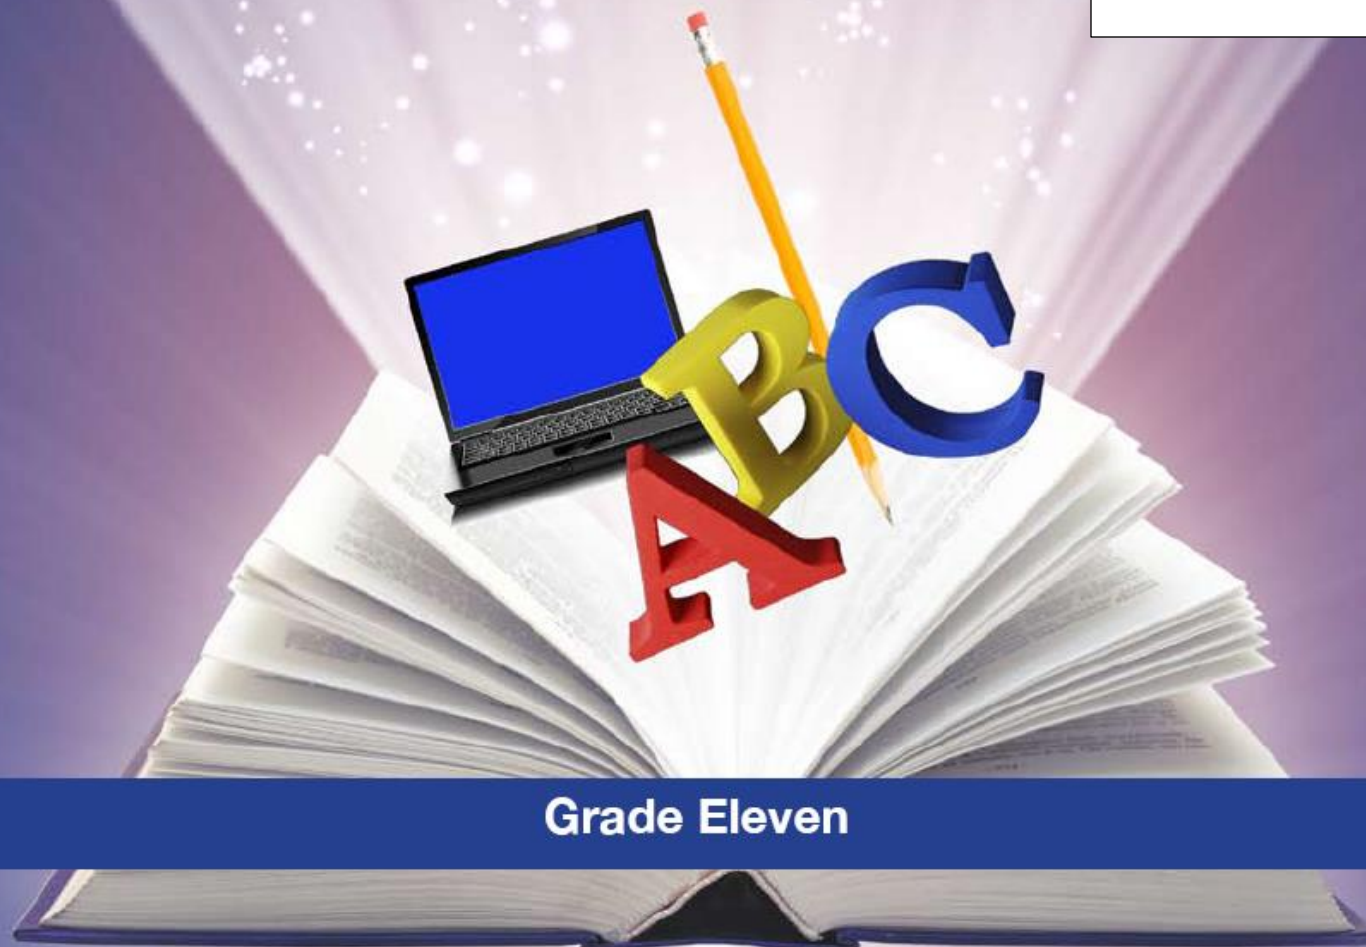

- Teachers should note that research can be individual, collaborative, cross-curricular, and integrated throughout the year.
- Research products should vary from small informative pieces to large multimodal presentations throughout the academic year.
- Teachers will teach students how to embed information correctly into research products.
- Teachers should utilize librarian/media specialist's assistance in teaching the research process.
- Teachers will make students aware of possible consequences of plagiarism.
- Teachers will emphasize giving credit to all sources used when gathering information including music, graphics, and another person's media.
- Teachers will have students demonstrate responsible use of the Internet.

# English Standards of Learning CURRICULUM FRAMEWORK

**2017**

**Grade Eleven**

Board of Education, Commonwealth of Virginia

~~At the eleventh-grade level, students will use a variety of oral communication skills and provide accurate evidence to give informative and persuasive oral presentations. They will also critique and assess the effectiveness of persuasive presentations by others. In addition, students will examine how persuasive media messages influence audiences' beliefs and behaviors.~~

**The student will create media messages and analyze the cause and effect relationships between mass media coverage and public opinion trends. Students will create persuasive multimodal presentations that address alternative perspectives. The eleventh-grade student continues to build communication skills working both independently and in collaborative groups. Students will continue to demonstrate the ability to work within collaborative groups while presenting alternate views and working toward common goals. Teachers will emphasize the importance of effective interpersonal communication and collaboration skills that are essential for success in future postsecondary education and workplace environments.**

**Teacher Notes:**

- **Please note presentation skills may differ within classrooms.**
- **Teachers should provide opportunities for students to create interactive multimodal presentations.**
- **Teachers should provide opportunities for small-group analysis and self-analysis of the effectiveness of communication.**
- **Teachers should note that the communication strand should be integrated throughout the year and can be used as part of reading, writing, and research.**
- **Teachers should provide opportunities for students to collaborate to solve problems.**
- **Multimodal is the strategic use of two or more interdependent modes of communication where both modes are essential to convey the intended message. For example: graphics, written language, moving images, music, audio, presentation technologies, movement, etc.**

<p><b>11.1 The student will make planned informative and persuasive multimodal, interactive presentations collaboratively and individually.</b></p> <p>a) Select and effectively use multimodal tools to design and develop presentation content.</p> <p>b) Credit information sources.</p> <p>c) Demonstrate the ability to work collaboratively with diverse teams.</p> <p>d) Respond thoughtfully and tactfully to diverse perspectives, summarizing points of agreement and disagreement.</p> <p>e) Use a variety of strategies to listen actively and speak using appropriate discussion rules with awareness of verbal and nonverbal cues.</p> <p>f) Anticipate and address alternative or opposing perspectives and counterclaims.</p> <p>g) Evaluate the various techniques used to construct arguments in multimodal presentations.</p> <p>h) Use vocabulary appropriate to the topic, audience, and purpose.</p> <p>i) Evaluate effectiveness of multimodal presentations.</p>

At the eleventh-grade level, students will apply knowledge of word origins, derivations, and figurative language to extend vocabulary development in authentic texts. Students will enhance their appreciation for literature by studying both classic and contemporary American literature. They will read a variety of literary genres and informational texts to identify the prevalent themes in American literature that are reflective of American history and culture. They will continue to develop vocabulary and reading comprehension skills and will apply those skills in other content areas, including history and social science, science, and mathematics. In addition, students will identify the contributions of other cultures to the development of American literature. When selecting texts, teachers will consider appropriateness of subject and theme as well as text complexity.

The student will continue development of vocabulary, with attention to connotations, idioms, classical allusions, and figurative language. In eleventh grade, there is a sustained emphasis on reading comprehension of fiction and nonfiction texts. Students will conduct comparative analyses of multiple texts that address the same topic to determine how authors reach similar or different conclusions. The students will examine and analyze fiction texts by American authors describing the contributions of other cultures and identifying prevalent themes and characterizations, which are reflective of American history and culture.

\*The bodies of literature for grades 10, 11, and 12 are interchangeable and may be taught in any of these grades.\*

Teacher Notes:

- Teachers should teach a balance of fiction including poetry and nonfiction throughout the academic year.
  - Nonfiction texts should include informational, persuasive, technical texts, and employment documents.
  - Fiction texts should include novels, short stories, poetry, drama, and literary nonfiction which employs the elements of fiction.
- Please note although the strands are developed separately, teachers should seamlessly integrate all strands.
  - Thematic units are one approach.
  - Teachers should have students write about what they have read.
- Vocabulary words should be culled from student reading instead of using random lists and should not be taught in isolation.
  - Although the vocabulary standards in high school remain similar, the word study should increase in complexity according to a variety of texts read. Vocabulary can also be differentiated according to text and level of student.
  - There is not a specific list of Greek/Latin roots, or idioms. Teachers may want to consult professional publications.
  - Teachers should provide instruction on classical allusions and how they can affect and deepen the meaning of the text.
- While whole-group instruction can be centered on a shared text, teachers must also provide opportunities for student choice with both fiction and nonfiction texts.
- Although the standard in fiction requires comparing/contrasting details in literary and informational nonfiction texts, teachers should be using paired passages with a variety of texts.
- Teachers should include literary texts that fulfill a social or cultural function depending on the time, location, theme and purpose of the author(s) across texts. For example, *The Grapes of Wrath*, which focuses on the plight of migrant farmers, affected the conscience of a nation and helped laws to change.
- Teachers should introduce students to longer, more complex texts both on grade level and above.
- Teachers should have students refer to the text(s) for support.
- Teachers should use fictional and informational texts paired on a common theme or topic and have students compare/contrast.

- Teachers should refer and deepen their understanding of the list of poetic elements and techniques and literary devices included in the Essential Knowledge, Skills, and Processes column for English SOL 9.4.
- Teachers will require the use of analytical and critical thinking skills to achieve the level expected in postsecondary education and the workplace.

At the eleventh-grade level, students will continue to develop as writers using the recursive writing process while writing in a variety of forms with an emphasis on persuasion and argumentation. They will write for multiple purposes and audiences to create focused, organized, and coherent writing. Students will be expected to have greater control over the conventions of writing and write and revise to a standard acceptable both in the workplace and postsecondary education. ~~At the eleventh-grade level, students will write in a variety of forms with an emphasis on persuasion.~~ They will produce arguments in writing that demonstrate knowledgeable judgments and address counterclaims. Students will use their knowledge of genres, formats, purposes, audiences, and situations to produce clear and effective products that reflect use of all stages of a **the** writing process.

**Teacher notes:**

- Teachers should recognize the difference between teaching writing and assigning writing.
- Teachers should recognize that there is not a required number of paragraphs or prescribed structure. Requiring students to use a prescribed model (i.e. 5 paragraphs) often produces formulaic writing and limits student expression.
- Teachers should model quality writing through published works and authentic texts.
- The focus of writing in eleventh grade is persuasion and argumentation.
- Teachers should demonstrate embedding narrative techniques in multiple forms of writing.
  - Teachers may want to consult professional publications.
- Teachers will instruct students in the features of the three domains of writing:
  - Composing-focusing on a clear, central idea, providing elaboration, organization, and unity
  - Written Expression- sentence variation, selected information, word choice, voice, and tone
  - Usage/Mechanics- grammar, punctuation, and usage as appropriate for the grade level
- Teachers will utilize writing conferences and portfolios to monitor student progress.
- Teachers will provide the opportunity for students to have practice writing on demand, for shorter time frames, and over extended periods of time.
- Teachers should provide opportunities for student choice with topic, audience, and purpose.

**11.6** The student will write in a variety of forms, to include persuasive/argumentative, reflective, interpretive, and analytic with an emphasis on persuasion/argumentation.

- a) Apply components of a recursive writing process for multiple purposes to create a focused, organized, and coherent piece of writing to address a specific audience and purpose.
- b) Produce arguments in writing developing a thesis that demonstrates knowledgeable judgments, addresses counterclaims, and provides effective conclusions.
- c) Organize claims, counterclaims, and evidence in a sustained and logical sequence.
- d) Adapt evidence, vocabulary, voice, and tone to audience, purpose, and situation.
- e) Use words, phrases, clauses, and varied syntax to create a cohesive argument.
- f) Blend multiple forms of writing including embedding narratives to produce effective essays.
- g) Revise writing for clarity of content, accuracy and depth of information.
- h) Write and revise to a standard acceptable both in the workplace and in postsecondary education.

~~At the eleventh-grade level, students will engage in research that requires the selection, evaluation, use, and documentation of a variety of sources. Students will verify the validity of all information and follow ethical and legal guidelines for using and gathering information. Each student will present a research product that is clearly written and accurately documented according to a standard form of documentation.~~

At the eleventh-grade level, students will apply research techniques to synthesize information from primary and secondary sources to produce a research product. They will evaluate the validity and authenticity of sources and will apply research techniques to quote, summarize, paraphrase, and embed findings. In addition, they will cite sources using either MLA or APA style sheet and follow ethical and legal guidelines for gathering and using information. Teachers will encourage the development of research skills that are foundational to effective critical thinking and responsible use of information necessary for success in future postsecondary education and workplace environments.

Teacher Notes:

- Teachers should note that research should be integrated throughout the year and can be individual, collaborative, and cross-curricular.
- Research products should vary from small, informative pieces to large, multimodal presentations throughout the academic year.
- Teachers will teach students how to embed information effectively into research products.
- Teachers should collaborate with librarian/media specialists throughout the research process.
- Teachers will make students aware of possible consequences of plagiarism in postsecondary education and the workplace.
- Teachers will emphasize giving credit to all sources used when gathering information including music, graphics, and another person's media.
- Teachers will have students demonstrate responsible use of the Internet.

# English Standards of Learning CURRICULUM FRAMEWORK

**2017**

**Grade Twelve**

Board of Education, Commonwealth of Virginia

~~At the twelfth-grade level, students will use organizational skills, audience awareness, appropriate vocabulary and grammar, and verbal and nonverbal presentation skills to plan and deliver an effective formal oral presentation. Students will use a variety of listening skills to evaluate oral presentations. In addition, students will examine media messages for their objectivity, subjectivity, and effects on the audience.~~

**The student will create media messages and analyze the cause and effect relationships between mass media coverage and public opinion trends. Students will create persuasive/argumentative multimodal presentations both independently and in collaborative groups. Students will continue to demonstrate the ability to work within diverse teams and collaborative groups working toward common goals. Teachers will emphasize the importance of effective interpersonal communication and collaboration skills that are essential for success in future postsecondary education and workplace environments.**

**Teacher Notes:**

- **Please note presentation skills may differ within classrooms.**
- **Teachers should provide opportunities for students to create interactive multimodal presentations.**
- **Teachers should provide opportunities for small-group analysis and self-analysis of the effectiveness of communication.**
- **Teachers should note that the communication strand should be integrated throughout the year and can be used as part of reading, writing, and research.**
- **Multimodal is the strategic use of two or more interdependent modes of communication where both modes are essential to convey the intended message. For example: graphics, written language, moving images, music, audio, presentation technologies, movement, etc.**

**12.1 The student will make planned persuasive/argumentative, multimodal, interactive presentations collaboratively and individually.**

- a) Select and effectively use multimodal tools to design and develop presentation content.
- b) Credit information sources.
- c) Demonstrate the ability to work collaboratively with diverse teams.
- d) Anticipate and address alternative or opposing perspectives and counterclaims.
- e) Evaluate the various techniques used to construct arguments in multimodal presentations.
- f) Use a variety of strategies to listen actively and speak using appropriate discussion rules with awareness of verbal and nonverbal cues.
- g) Critique effectiveness of multimodal presentations.

At the twelfth-grade level, students will apply knowledge of word origins, derivations, and figurative language to extend vocabulary development in authentic texts. They will analyze British literature and literature of other cultures with emphasis on the many classic works that may be studied. In addition, students will read nonfiction and technical texts and continue to develop their own reading-process skills. Students will apply these reading skills in other content areas, including history and social science, science, and mathematics. When selecting texts, teachers will consider appropriateness of subject and theme as well as text complexity. The student will continue development of vocabulary, with attention to connotations, idioms, classical allusions, and figurative language. There is a sustained emphasis on reading comprehension of fiction and nonfiction texts. Students will review multiple texts to identify and evaluate resources to make decisions and solve problems. The students will examine and analyze fiction texts by British authors evaluating how authors use key elements to contribute to meaning and interpreting how themes are connected across texts. \*The bodies of literature for grades 10, 11, and 12 are interchangeable and may be taught in any of these grades as determined by the local school division.\*

Teacher Notes:

- Teachers should teach a balance of fiction including poetry and nonfiction throughout the academic year.
  - Nonfiction texts should include informational, persuasive, technical texts, and employment documents.
- Please note although the strands are developed separately, teachers should seamlessly integrate all strands.
  - Thematic units are one approach.
  - Teachers should have students respond in writing about what they have read focusing on inferential and evaluative questions about the text(s).
- Vocabulary words should be culled from student reading instead of using random lists and should not be taught in isolation.
- Vocabulary can also be differentiated according to text, and level of student.
  - There is not a specific list of Greek/Latin roots, or idioms. Teachers may want to consult professional publications.
  - Teachers should provide instruction on allusions and how they can impact and deepen the meaning of the text.
- While whole-group instruction can be centered on a shared text, teachers must also provide opportunities for student choice with both fiction and nonfiction texts.
- Although the standard in fiction requires comparing/contrasting details in literary and informational nonfiction texts, teachers should be using paired passages with a variety of texts.
- Teachers should include literary texts that fulfill a social or cultural function depending on the time, location, theme and purpose of the author(s) across texts. For example, *Macbeth*, focuses on the domineering wife whose ambitions cause the tyranny of her husband and the downfall of a kingdom.
- Teachers should introduce students to longer, more complex texts both on grade level and above.
- Teachers should have students cite the text(s) for support.
- Teachers should use fictional and informational texts paired on a common theme or topic and have students compare/contrast.
- A list of poetic elements and techniques and literary devices is included in the Essential Knowledge, Skills, and Processes column for English SOL 9.4
- A list of rhetorical and persuasive devices is included in the Essential Knowledge, Skills, and Processes column for English SOL 11.5.

- Teachers will require the use of analytical and critical thinking skills to achieve the level expected in postsecondary education and the workplace environment.

<p><b>12.3 The student will apply knowledge of word origins, derivations, and figurative language to extend vocabulary development in authentic texts.</b></p> <p>a) Use structural analysis of roots, affixes, synonyms, and antonyms, to understand complex words.</p> <p>b) Use context, structure, and connotations to determine meanings of words and phrases.</p> <p>c) Discriminate between connotative and denotative meanings and interpret the connotation.</p> <p>d) Explain the meaning of common idioms, and literary and classical allusions in text.</p> <p>e) Extend general and cross-curricular vocabulary through speaking, listening, reading, and writing.</p>

~~At the twelfth-grade level, students will produce expository, informational, analytic, and persuasive/argumentative papers that are logically organized and contain clear and accurate ideas. Students will clarify and defend a position using precise and relevant evidence. In addition, students will revise writing for clarity of content and depth of information.~~

At the twelfth-grade level, students will continue to develop as readers and writers. The student will use the recursive writing process while writing in a variety of forms with an emphasis on persuasion and argumentation for multiple purposes and audiences to create focused, organized, and coherent writing. Students will be expected to have greater control over the conventions of writing and write and revise to a standard acceptable both in the workplace and postsecondary education.

Teacher notes:

- Teachers should recognize the difference between teaching writing and assigning writing.
- Teachers should reference quality writing in published works as models.
- The focus of writing in twelfth grade is persuasion and argumentation.
- Teachers will teach students to blend multiple forms of writing and embed narrative techniques.
  - Teachers may want to consult professional publications.
- Three examples of reflective writing include the following:
  - Technical – which includes what worked or did not work and why, problem-solving techniques, and theories that were used or tested.
  - Collaborative – which is centered on team dynamics: how everyone worked together and why, and what worked or did not work and why.
  - Individual - What did I learn, how did I learn it, and what could I have done better?
- Teachers will utilize writing conferences and portfolios to monitor student progress.
- Teachers will provide opportunities for students to write for a variety of circumstances including writing on demand, for shorter time frames, and over extended periods of time.
- Teachers should provide opportunities for student choice with topic, audience, and purpose.

**12.6 The student will write in a variety of forms to include persuasive/argumentative-reflective, interpretive, and analytic with an emphasis on persuasion/argumentation.**

~~At the twelfth-grade level, students will produce well-documented research papers, using a standard method of documentation, such as MLA or APA.~~

~~Students will critically evaluate the accuracy, quality, and validity of all information and follow ethical and legal guidelines for using and gathering information.~~

At the twelfth-grade level, students will apply research techniques to synthesize information to produce a research product. They will evaluate the validity and authenticity of sources and will apply research techniques to quote, summarize, paraphrase, and embed findings. In addition, they will cite sources using either MLA or APA style sheet and follow ethical and legal guidelines for gathering and using information. Teachers will encourage the development of research skills that are foundational to effective critical thinking and responsible use of information necessary for success in future postsecondary education and workplace environments.

Teacher Notes:

- Teachers should note that research should be integrated throughout the year and can be individual, collaborative, and cross-curricular.
- Research products should vary from small informative pieces to large multimodal presentations throughout the academic year.
- Teachers will teach students how to embed information effectively into research products.
- Teachers should utilize librarian/media specialists assistance in teaching the research process.
- Teachers should instruct students about the various types and possible consequences of plagiarism including awareness of postsecondary and workplace policies
- Teachers will emphasize giving credit to all sources used when gathering information including music, graphics, and another person's media.
- Teachers will make students aware of possible consequences of plagiarism in postsecondary education and the workplace.
- Teachers will have students demonstrate responsible use of the Internet.

**12.8 The student will analyze, evaluate, synthesize, and organize information from a variety of credible resources to produce a research product.**

- a) Frame, analyze, and synthesize information to solve problems, answer questions, and generate new knowledge.
- b) Analyze information gathered from diverse sources by identifying misconceptions, main and supporting ideas, conflicting information, point of view, or bias.
- c) Critically evaluate the accuracy, quality, and validity of the information.
- d) Cite sources for both quoted and paraphrased ideas using a standard method of documentation, such as that of the Modern Language Association (MLA) or the American Psychological Association (APA).
- e) Define the meaning and consequences of plagiarism and follow ethical and legal guidelines for gathering and using information.
